PRE-PROGRAM ASSESSMENT

The Bauer Leadership Center is pleased to offer you this comprehensive individualized feedback report based on the assessment you completed before the program. Although the document is long, we hope that you will find the content worthwhile. For those limited in time, the report is organized in sections that clearly distinguish the overall findings from more detailed findings that can be skimmed as you wish.

Pour yourself a cup of your favorite beverage and dive in!

THE HEXACO PERSONALITY INVENTORY: Feedback Report

The HEXACO Personality Inventory (HPI; Lee & Ashton, 2006) to assess six basic dimensions of personality. "HEXACO" is an acronym that can help you remember both the number of personality dimensions assessed (the Greek prefix "hexa" means six): H = Honesty-Humility, E = Emotionality, X = Extraversion, A = Agreeableness, C = Conscientiousness, and O = Openness to Experience.

Your HEXACO scores can be useful as you work to understand your core personality, i.e., your characteristic ways of thinking, feeling, and behaving. –This personality self-awareness -- is an important input to enhance your interpersonal and leadership skills.

This report summarizes your scores on each HEXACO dimension and subdimension based on your responses to the 60-item questionnaire. For each you will find your score as well as the average score for others in your EMBA cohort and other Bauer Leadership Center (BLC) programs.

Keep in mind that higher (or lower) scores for personality are not a matter of better or worse, but rather personal styles that are all equally valid. The goal is self-awareness and personal understanding.

This report is includes:

Part 1: Your HEXACO Personality Dimensions

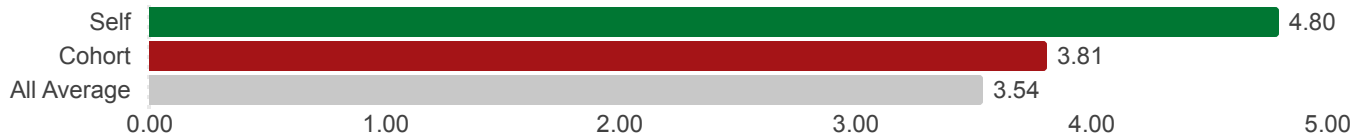

Part 2: Your HEXACO Sub-dimensions

- A. Honesty-Humility Scores
- B. Emotionality
- C. Extraversion
- D. Agreeableness
- E. Conscientiousness
- F. Openness to Experience

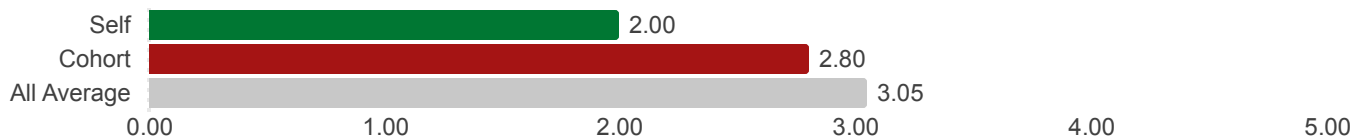

PART 1: YOUR HEXACO PERSONALITY DIMENSIONS

The following is a summary of your scores on the six HEXACO domains, compared to Bauer Center averages based on hundreds of individuals. Definitions of each domain in the section that immediately follows.

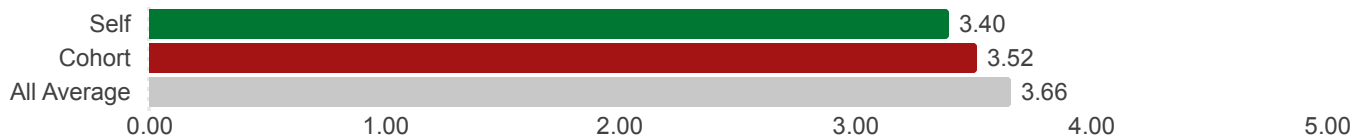

HONEST-HUMILITY

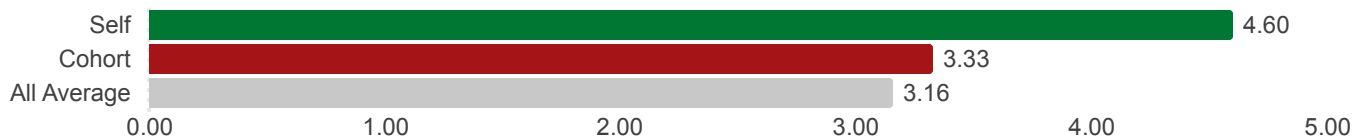

EMOTIONALITY

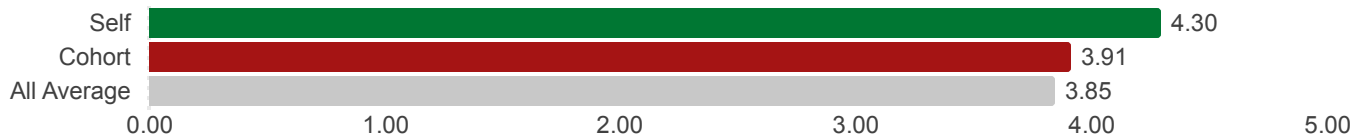

EXTRAVERSION

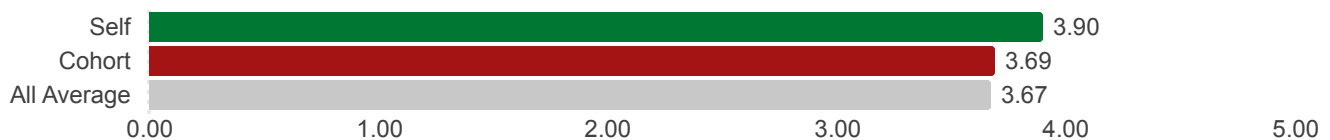

AGREEABLENESS

CONSCIENTIOUSNESS

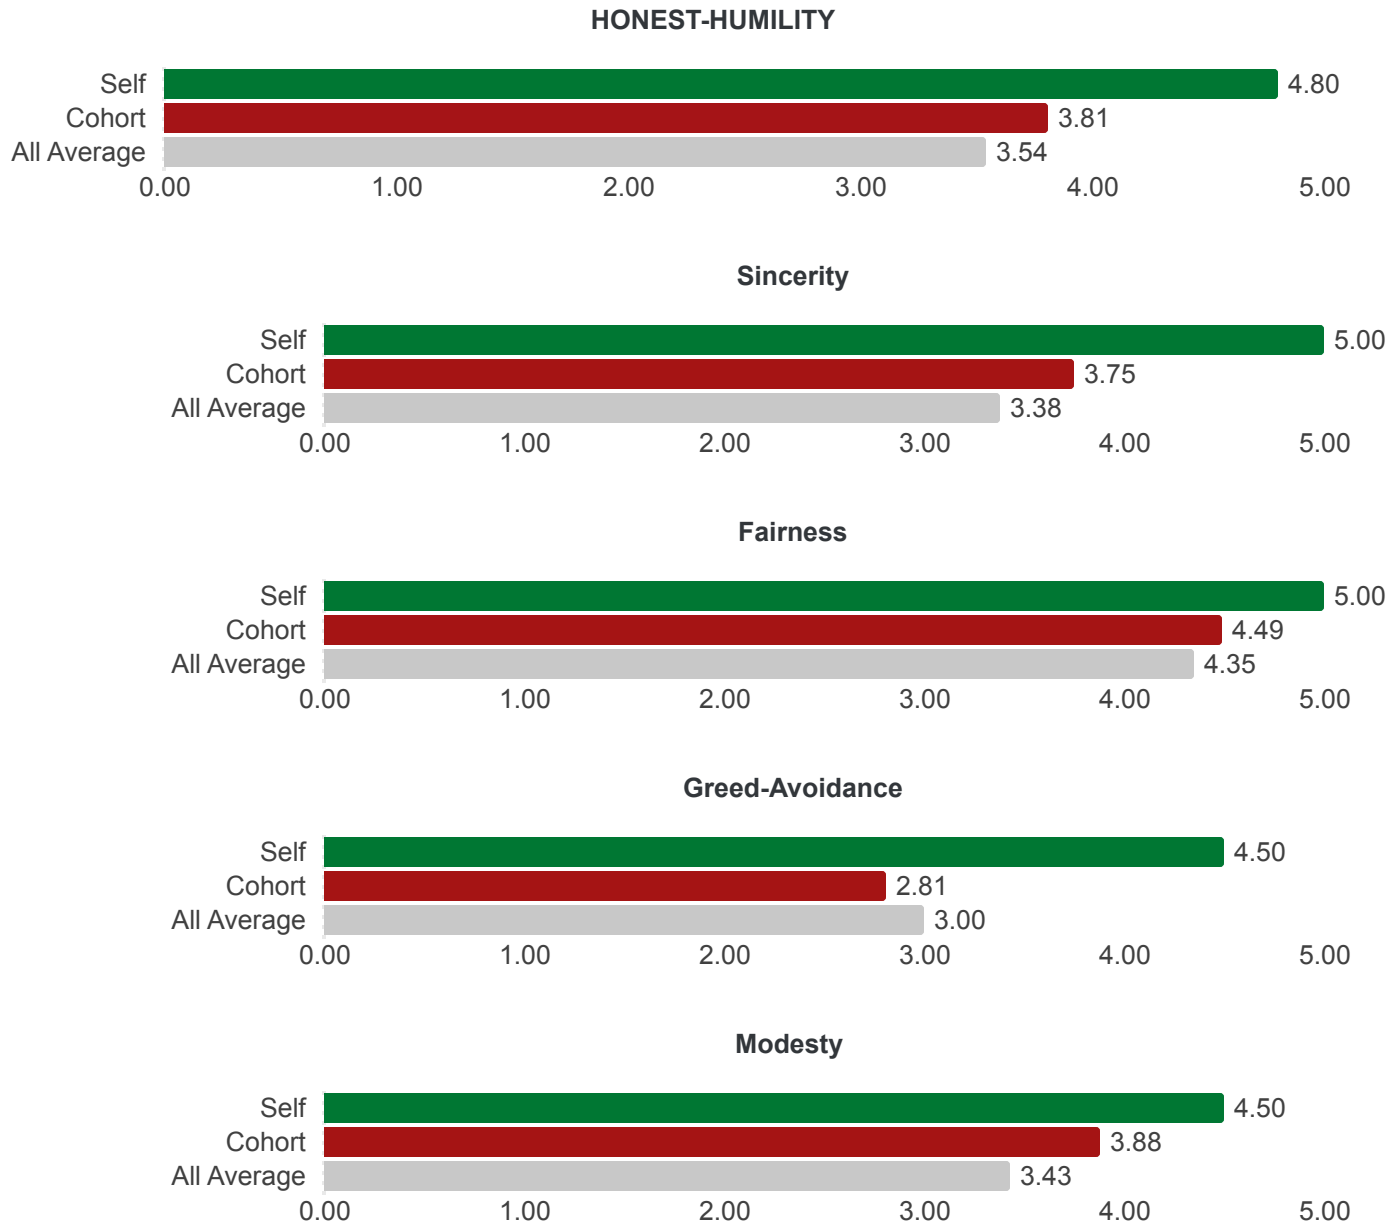

OPENNESS TO EXPERIENCE

PART 2A: HONESTY-HUMILITY

The following includes subdimensions of HONESTY-HUMILITY

DOMAIN-LEVEL SCALE

Honesty-Humility: Persons with very high scores on the Honesty-Humility scale avoid manipulating others for personal gain, feel little temptation to break rules, are uninterested in lavish wealth and luxuries, and feel no special entitlement to elevated social status. Conversely, persons with very low scores on this scale will flatter others to get what they want, are inclined to break rules for personal profit, are motivated by material gain, and feel a strong sense of self-importance.

FACET-LEVEL SCALES

The **Sincerity** scale assesses a tendency to be genuine in interpersonal relations. Low scorers will flatter others or pretend to like them in order to obtain favors, whereas high scorers are unwilling to manipulate others.

The **Fairness** scale assesses a tendency to avoid fraud and corruption. Low scorers are willing to gain by cheating or

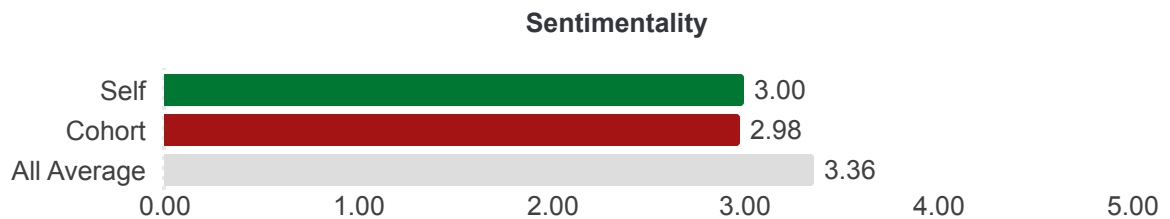

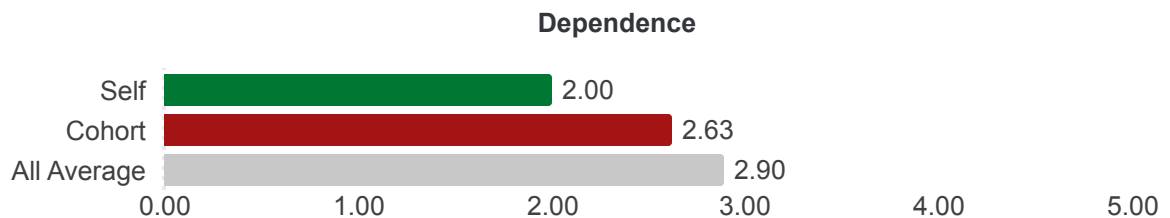

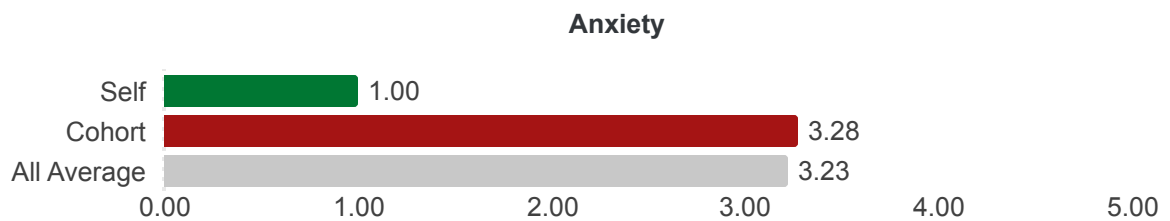

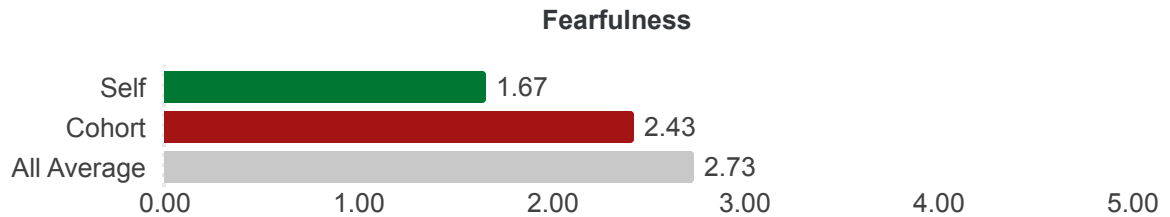

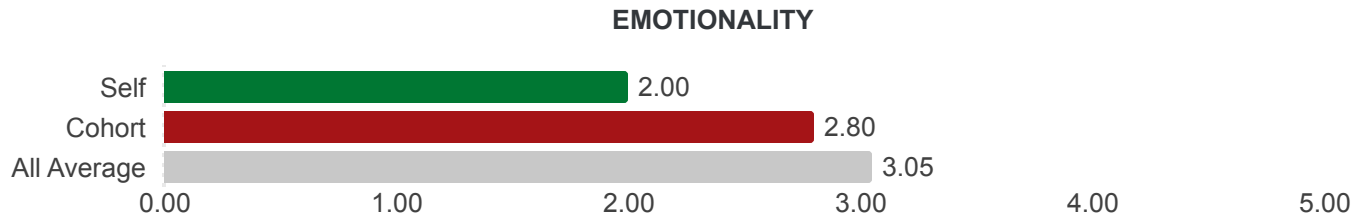

stealing, whereas high scorers are unwilling to take advantage of other individuals or of society at large.

The **Greed Avoidance** scale assesses a tendency to be uninterested in possessing lavish wealth, luxury goods, and signs of high social status. Low scorers want to enjoy and to display wealth and privilege, whereas high scorers are not especially motivated by monetary or social-status considerations.

The **Modesty** scale assesses a tendency to be modest and unassuming. Low scorers consider themselves as superior and as entitled to privileges that others do not have, whereas high scorers view themselves as ordinary people without any claim to special treatment.

PART 2B: EMOTIONALITY

The following includes subdimensions of EMOTIONALITY.

DOMAIN-LEVEL SCALE

Emotionality: Persons with very high scores on the Emotionality scale experience fear of physical dangers, experience anxiety in response to life's stresses, feel a need for emotional support from others, and feel empathy and sentimental attachments with others. Conversely, persons with very low scores on this scale are not deterred by the prospect of physical harm, feel little worry even in stressful situations, have little need to share their concerns with others, and feel emotionally detached from others.

FACET-LEVEL SCALES

The **Fearfulness** scale assesses a tendency to experience fear. Low scorers feel little fear of injury and are relatively tough, brave, and insensitive to physical pain, whereas high scorers are strongly inclined to avoid physical harm.

The **Anxiety** scale assesses a tendency to worry in a variety of contexts. Low scorers feel little stress in response to difficulties, whereas high scorers tend to become preoccupied even by relatively minor problems.

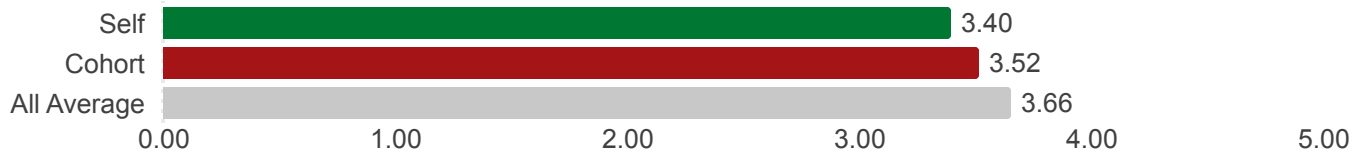

The **Dependence** scale assesses one's need for emotional support from others. Low scorers feel self-assured and able to deal with problems without any help or advice, whereas high scorers want to share their difficulties with those who will provide encouragement and comfort.

The **Sentimentality** scale assesses a tendency to feel strong emotional bonds with others. Low scorers feel little emotion when saying good-bye or in reaction to the concerns of others, whereas high scorers feel strong emotional attachments and an empathic sensitivity to the feelings of others.

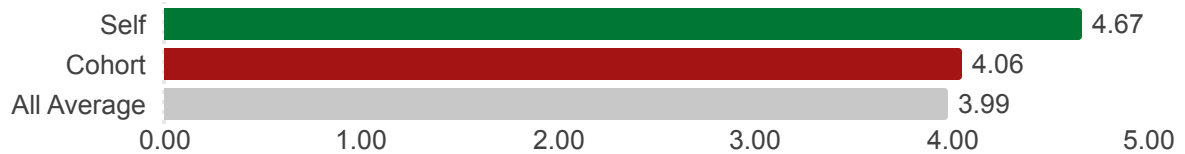

PART 2C: EXTRAVERSION

The following includes subdimensions of EXTRAVERSION.

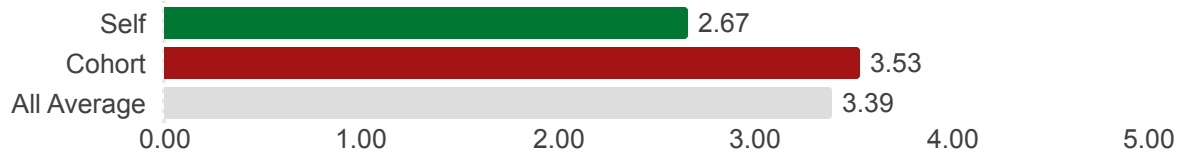

EXTRAVERSION

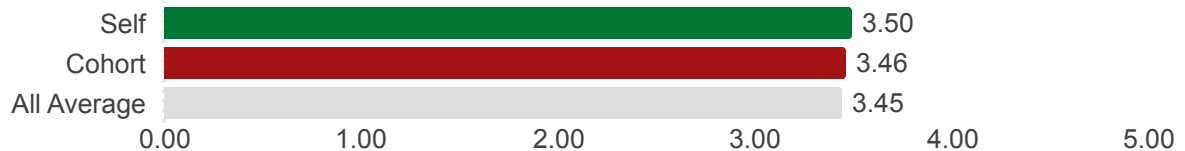

Social Self-Esteem

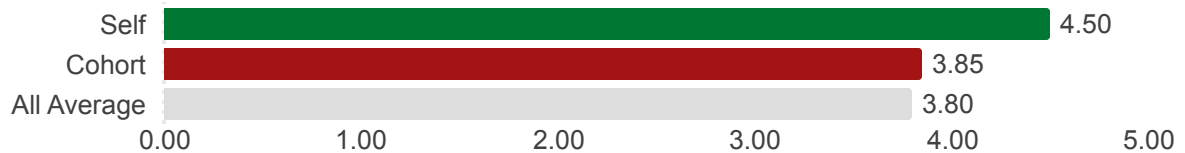

Social Boldness

Sociability

Liveliness

DOMAIN-LEVEL SCALE

Extraversion: Persons with very high scores on the Extraversion scale feel positively about themselves, feel confident when leading or addressing groups of people, enjoy social gatherings and interactions, and experience positive feelings of enthusiasm and energy. Conversely, persons with very low scores on this scale consider themselves unpopular, feel awkward when they are the center of social attention, are indifferent to social activities, and feel less lively and optimistic than others do.

FACET-LEVEL SCALES

The **Social Self-Esteem** scale assesses a tendency to have positive self-regard, particularly in social contexts. High scorers are generally satisfied with themselves and consider themselves to have likable qualities, whereas low scorers tend to have a sense of personal worthlessness and to see themselves as unpopular.

The **Social Boldness** scale assesses one's comfort or confidence within a variety of social situations. Low scorers feel shy or awkward in positions of leadership or when speaking in public, whereas high scorers are willing to approach strangers and are willing to speak up within group settings.

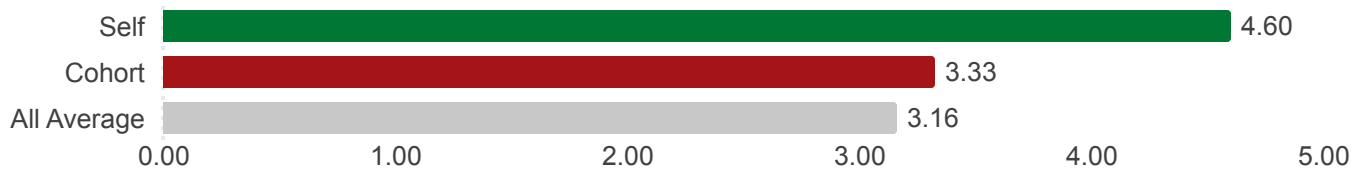

The **Sociability** scale assesses a tendency to enjoy conversation, social interaction, and parties. Low scorers generally prefer solitary activities and do not seek out conversation, whereas high scorers enjoy talking, visiting, and celebrating with others.

The **Liveliness** scale assesses one's typical enthusiasm and energy. Low scorers tend not to feel especially cheerful or dynamic, whereas high scorers usually experience a sense of optimism and high spirits.

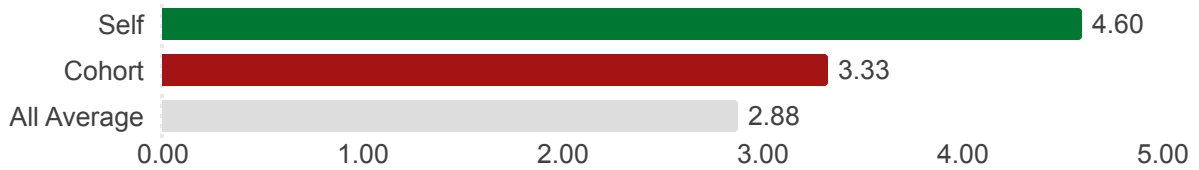

PART 2D: AGREEABLENESS

The following includes subdimensions of AGREEABLENESS.

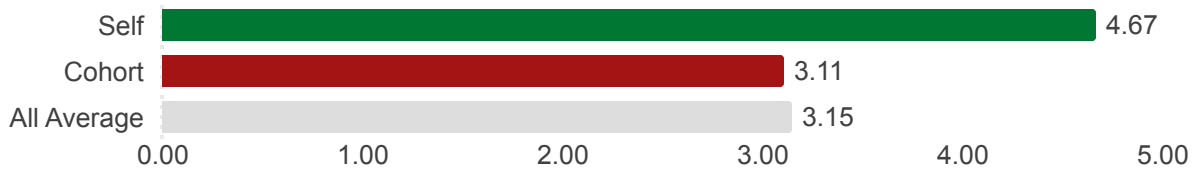

AGREEABLENESS

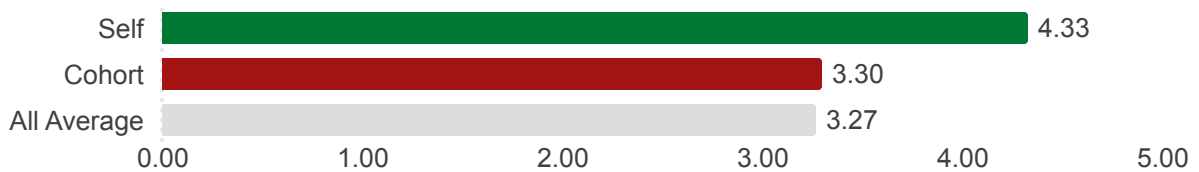

Forgiveness

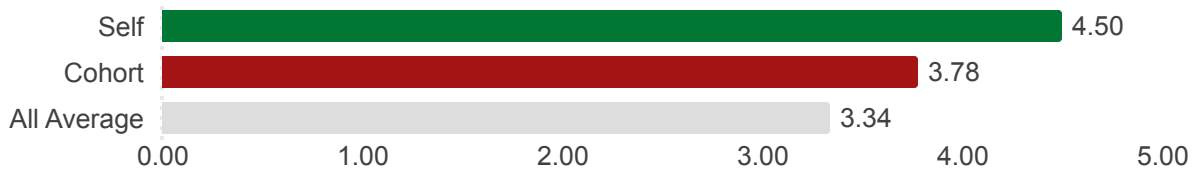

Gentleness

Flexibility

Patience

DOMAIN-LEVEL SCALE

Agreeableness (versus Anger): Persons with very high scores on the Agreeableness scale forgive the wrongs that they suffered, are lenient in judging others, are willing to compromise and cooperate with others, and can easily control their temper. Conversely, persons with very low scores on this scale hold grudges against those who have harmed them, are rather critical of others' shortcomings, are stubborn in defending their point of view, and feel anger readily in response to mistreatment.

FACET-LEVEL SCALES

The **Forgivingness** scale assesses one's willingness to feel trust and liking toward those who may have caused one harm. Low scorers tend "hold a grudge" against those who have offended them, whereas high scorers are usually ready to trust others again and to re-establish friendly relations after having been treated badly.

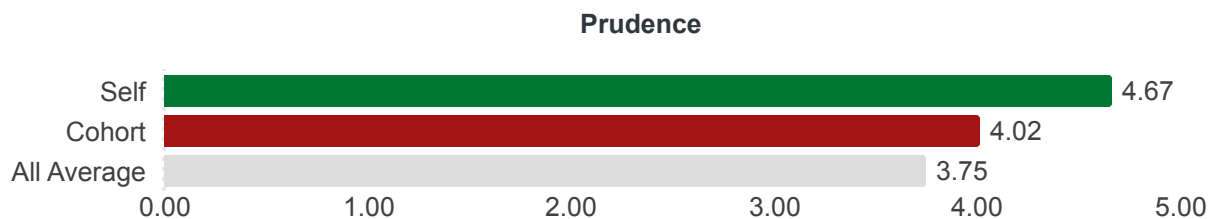

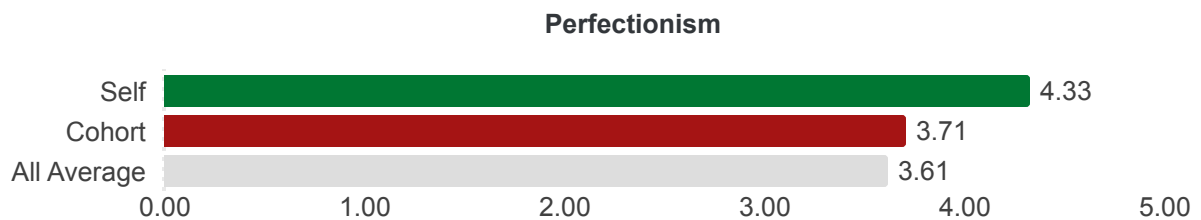

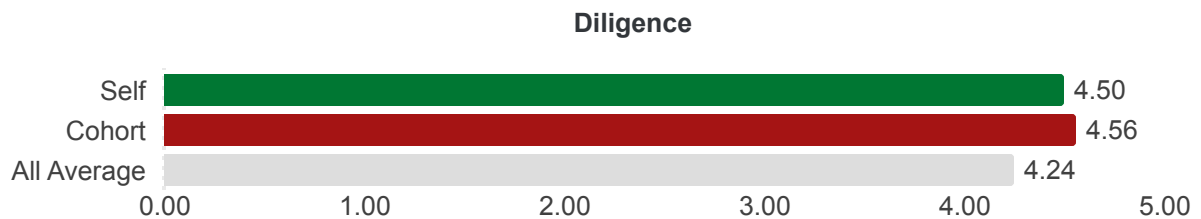

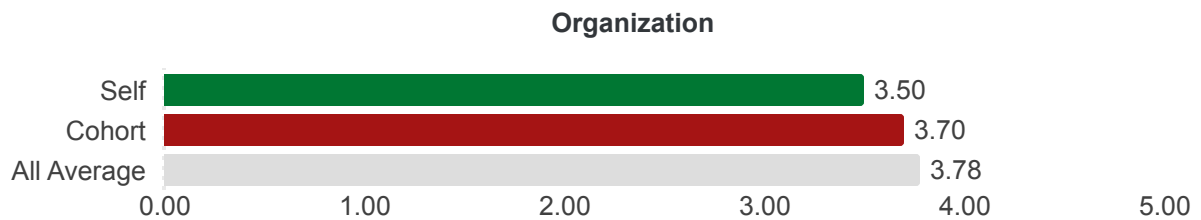

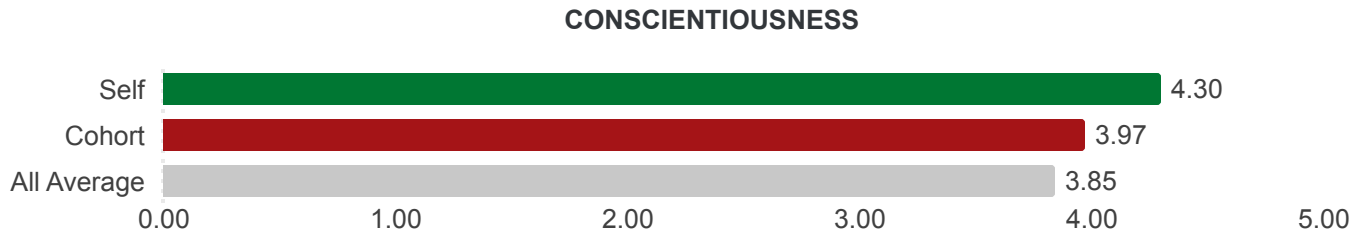

The **Gentleness** scale assesses a tendency to be mild and lenient in dealings with other people. Low scorers tend to be critical in their evaluations of others, whereas high scorers are reluctant to judge others harshly.

The **Flexibility** scale assesses one's willingness to compromise and cooperate with others. Low scorers are seen as stubborn and are willing to argue, whereas high scorers avoid arguments and accommodate others' suggestions, even when these may be unreasonable.

The **Patience** scale assesses a tendency to remain calm rather than to become angry. Low scorers tend to lose their tempers quickly, whereas high scorers have a high threshold for feeling or expressing anger.

PART 2E: CONSCIENTIOUSNESS SCORES

The following includes subdimensions of CONSCIENTIOUSNESS.

DOMAIN-LEVEL SCALE

Conscientiousness: Persons with very high scores on the Conscientiousness scale organize their time and their physical surroundings, work in a disciplined way toward their goals, strive for accuracy and perfection in their tasks, and deliberate carefully when making decisions. Conversely, persons with very low scores on this scale tend to be unconcerned with orderly surroundings or schedules, avoid difficult tasks or challenging goals, are satisfied with work that contains some errors, and make decisions on impulse or with little reflection.

FACET-LEVEL SCALES

The **Organization** scale assesses a tendency to seek order, particularly in one's physical surroundings. Low scorers tend to be sloppy and haphazard, whereas high scorers keep things tidy and prefer a structured approach to tasks.

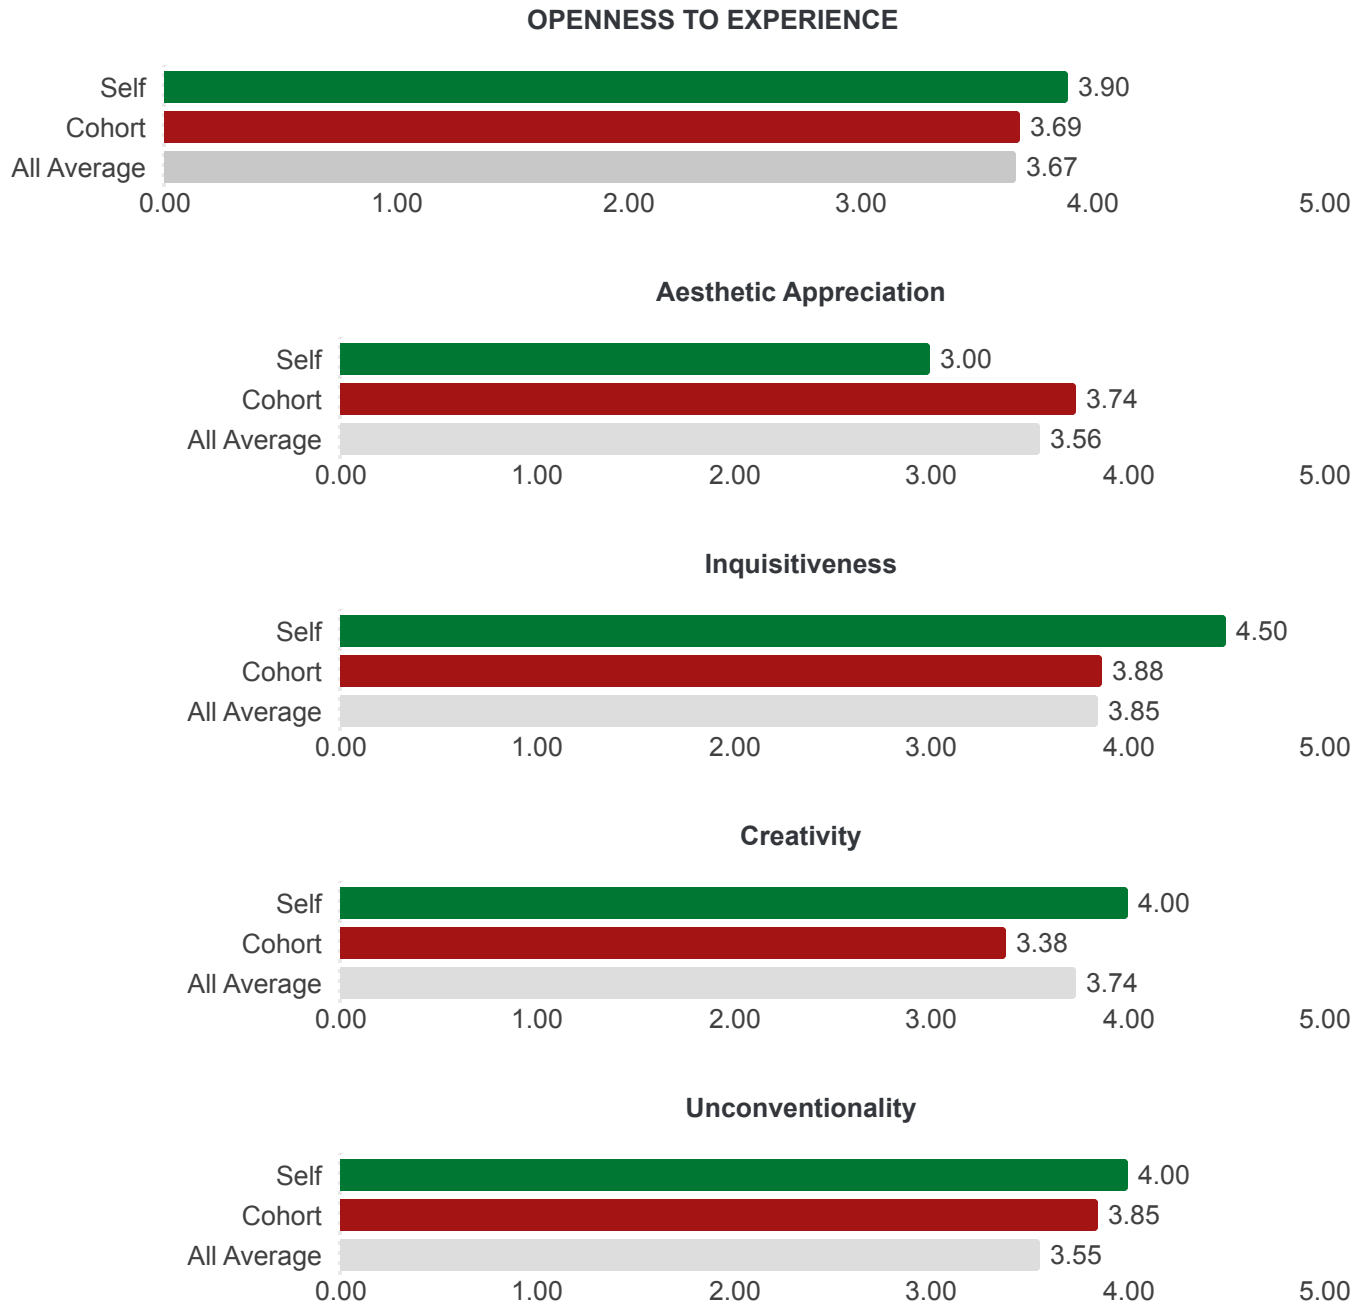

The **Diligence** scale assesses a tendency to work hard. Low scorers have little self-discipline and are not strongly motivated to achieve, whereas high scorers have a strong "work ethic" and are willing to exert themselves.

The **Perfectionism** scale assesses a tendency to be thorough and concerned with details. Low scorers tolerate some errors in their work and tend to neglect details, whereas high scorers check carefully for mistakes and potential improvements.

The **Prudence** scale assesses a tendency to deliberate carefully and to inhibit impulses. Low scorers act on impulse and tend not to consider consequences, whereas high scorers consider their options carefully and tend to be cautious and self-controlled.

PART 2F: OPENNESS TO EXPERIENCE

The following includes subdimensions of OPENNESS TO EXPERIENCE

DOMAIN-LEVEL SCALE

Openness to Experience: Persons with very high scores on the Openness to Experience scale become absorbed in the beauty of art and nature, are inquisitive about various domains of knowledge, use their imagination freely in everyday life, and take an interest in unusual ideas or people. Conversely, persons with very low scores on this scale are rather unimpressed by most works of art, feel little intellectual curiosity, avoid creative pursuits, and feel little attraction toward ideas that may seem radical or unconventional.

FACET-LEVEL SCALES

The **Aesthetic Appreciation** scale assesses one's enjoyment of beauty in art and in nature. Low scorers tend not to become absorbed in works of art or in natural wonders, whereas high scorers have a strong appreciation of various art forms and of natural wonders.

The **Inquisitiveness** scale assesses a tendency to seek information about, and experience with, the natural and human world. Low scorers have little curiosity about the natural or social sciences, whereas high scorers read widely and are interested in travel.

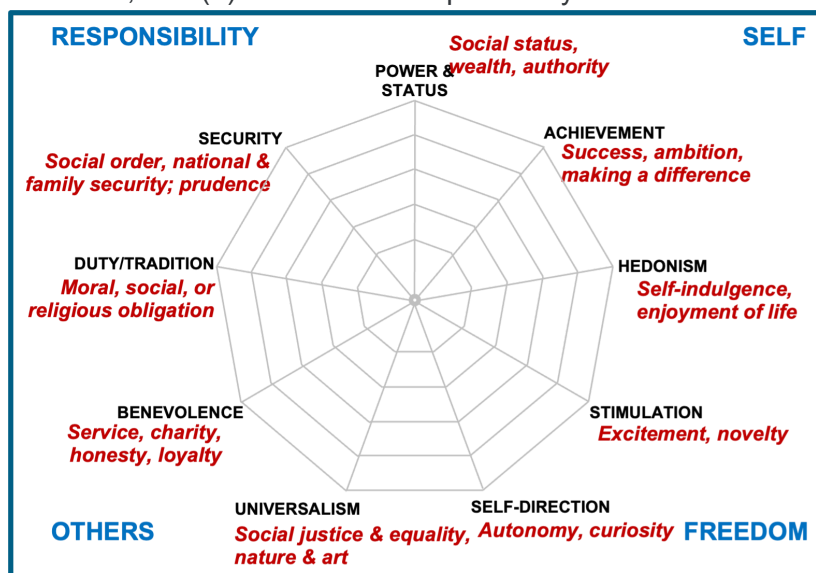

The **Creativity** scale assesses one's preference for innovation and experiment. Low scorers have little inclination for original thought, whereas high scorers actively seek new solutions to problems and express themselves in art.

The **Unconventionality** scale assesses a tendency to accept the unusual. Low scorers avoid eccentric or nonconforming persons, whereas high scorers are receptive to ideas that might seem strange or radical.

THE BAUER LEADERSHIP VALUES INVENTORY: Feedback Report

The *Bauer Leadership Values Inventory* (BLVI) was prepared by the Bauer Leadership Center (BLC) at Washington University in St. Louis to provide insight into the values and purposes that guide your decisions and actions as a leader.

PART 1 – Personal Values. The personal values examined in the BLVI are based Schwartz's (1992) research-based framework of basic human values that span countries and cultures. As shown in the image below, these values are arranged in a circular order so that values adjacent to one another are conceptually similar whereas values distant from one another are conceptually dissimilar. The two main axes underlie these similarities and differences are (1) self vs. others, and (2) freedom vs. responsibility.

You can add the scores below to this diagram if you would like a visual example.

The values are:

- **Power & Status.** The defining goal of Power & Status is social status and prestige along with control or dominance over people and resources. Individuals who score high on Power & Status prioritize authority, wealth, position, and status in society.
- **Achievement.** The defining goal of Achievement is personal success through demonstrating competence in society. Individuals who score high on Achievement prioritize ambition, success, social approval, and having influence.
- **Hedonism.** The defining goal of Hedonism is pleasure or gratification of desires. Individuals who score high on Hedonism prioritize pleasure-seeking, self-indulgence, and enjoying life.
- **Stimulation.** The defining goal of Stimulation is excitement, novelty, and challenge in life. Individuals who score high in Stimulation prioritize variety and an optimal level of thrill and excitement in their lives.

(Continued on next page)

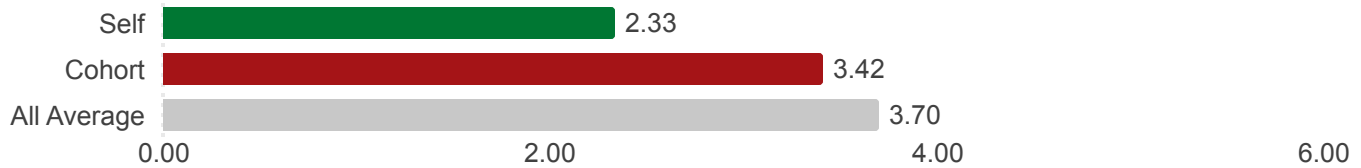

- **Self-Direction.** The defining goal of Self-Direction is independence of thought and action, the freedom to choose, create, & explore. Individuals who score high in Self-Direction prioritize autonomy and having control over their goals and choices.
- **Universalism.** The defining goal of universalism is understanding, appreciation, tolerance, and protection for the welfare of all people and for nature. Individuals who score high on Universalism prioritize equality, social justice, broad-mindedness, wisdom, a world at peace, and beauty of nature and the arts.
- **Benevolence.** The defining goal of benevolence is preserving and enhancing the welfare of others, especially those close to us. Individuals who score high on Benevolence prioritize helpfulness, honesty, forgiveness, loyalty, and friendship.
- **Duty/Tradition.** The defining goal of Duty/Tradition is exercising self-restraint to meet social norms, the expectations of society, and the traditions or customs or one's culture or religion. Individuals who score high on Duty/Tradition prioritize self-discipline, politeness, family responsibility, moral or religious devotion, and modesty.
- **Security.** The defining goal of Security is safety, harmony, and stability for society, one's relationships, and one's self. Individuals who score high on Security prioritize social order, family security, national security, and cleanliness.

Your scores on each of the above values were measured using the *Portrait Values Questionnaire* (see Schwartz et al., 2001). Your summary report includes your self-ratings on each value, compared with BLC averages. These scores, which are shown on the graph on the next page, can be plotted onto the circumplex on page 2 for comparison.

PART 1. VALUES

The following graph presents your self-rating and the BLC average rating for each of the nine values. BLC averages are based on responses from your cohort and hundreds of past participants in BLC programs. Scores are on a scale from 1 (not at all like me) to 6 (very much like me).

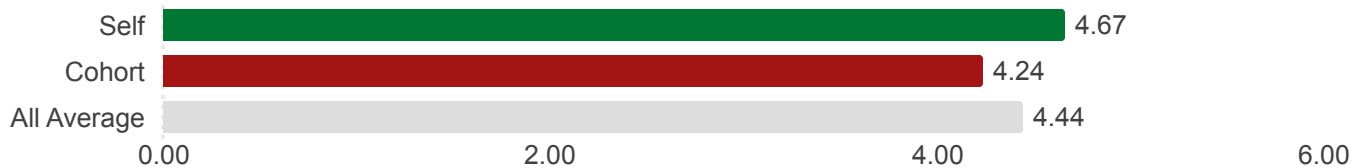

Power and Status

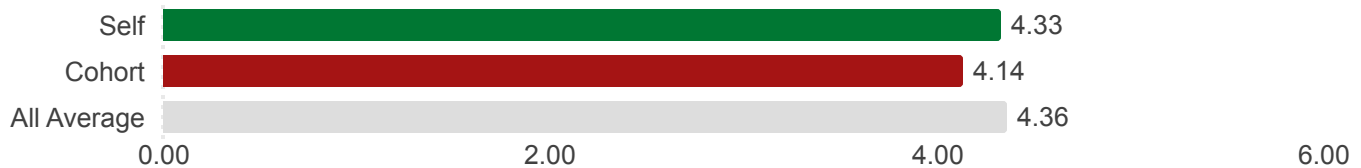

Achievement

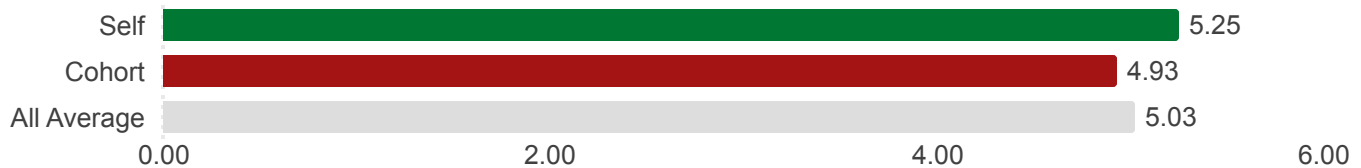

Hedonism

Stimulation

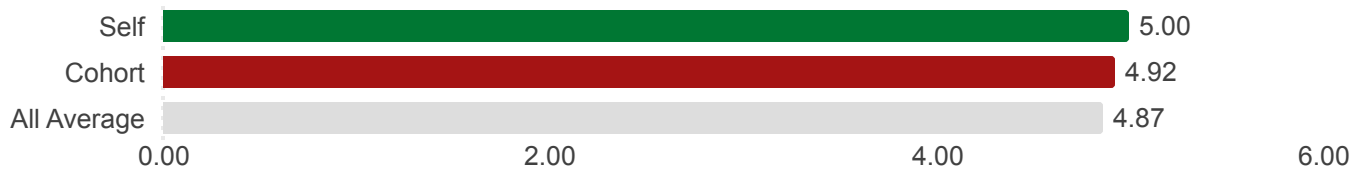

Self Direction

Universalism

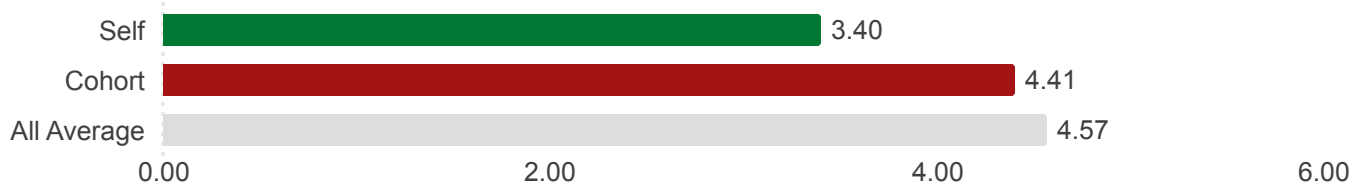

Benevolence

Duty and Tradition

Security

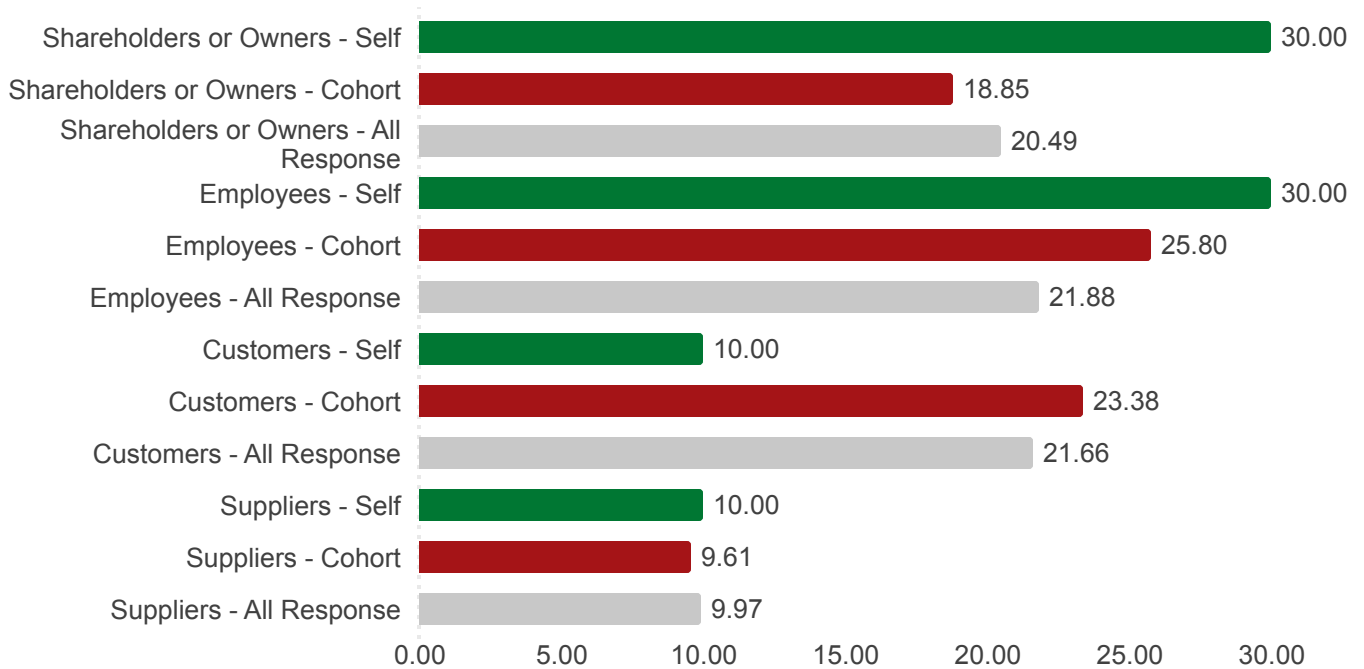

PART 2 - Felt Stakeholder Responsibility. The second section of this report summarizes your responses to questions about the stakeholders to whom you feel responsible as a manager. The actions of business leaders affect a range of different stakeholders, including shareholders/owners, employees, customers, suppliers, the environment, and the broader community/society. People disagree, however, about how much business leaders should be held responsible for the welfare of these different groups. In the end, this is a personal question -- how much do YOU feel responsible to consider the interests and welfare of different stakeholders as a current or prospective business leader? This report summarizes where you stand on this question, compared with BLC averages.

PART 2. FELT STAKEHOLDER RESPONSIBILITIES

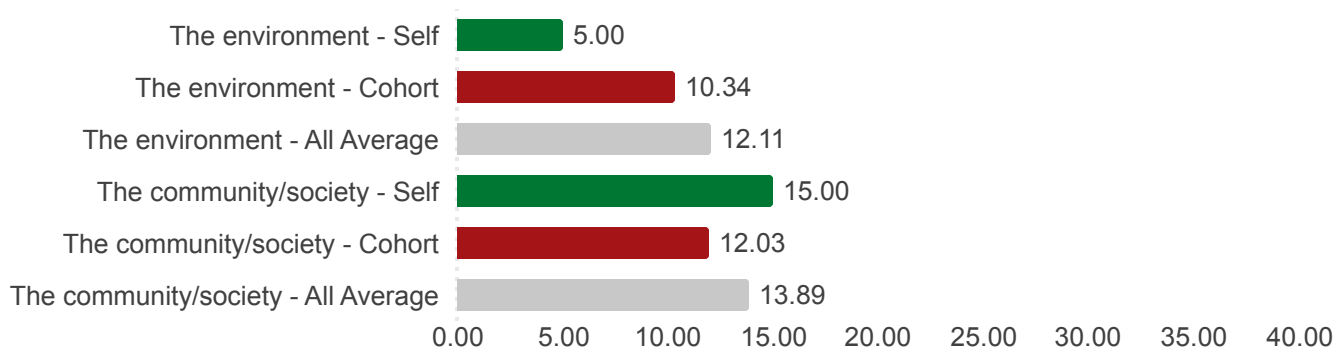

The following table summarizes your answers to the question: "As a current or prospective business leader, how much responsibility do YOU feel to act in ways that take the interests/welfare of the following groups into account?"

You were asked to allocate 100 points across the following stakeholder groups.

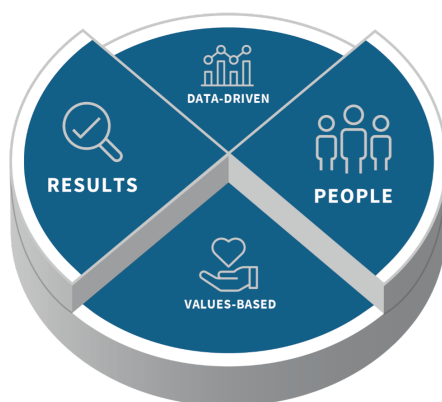

Primary Stakeholders

Secondary Stakeholders

THE BAUER LEADERSHIP COMPETENCY ASSESSMENT I: Feedback Report

This report summarizes your self- and other-ratings (manager, peers and direct reports) on each of the competencies in the *Bauer Leadership Competency Model*. It therefore provides a comprehensive, 360-degree feedback tool that you can use to accelerate your development as a values-based, data-driven leader.

For a more detailed overview of the *Bauer Leadership Competency Assessment* and how to interpret your scores, click [here](https://wustl.box.com/s/ip02s7y3r1j2gxohel70jg0s72ih4qgm) to view a brief instructional video (https://wustl.box.com/s/ip02s7y3r1j2gxohel70jg0s72ih4qgm).

Your report includes the following sections:

1. **Competency Snapshot:** provides a high-level summary of your scores on each of the competencies in the Bauer Leadership Competency Model.
2. **Values-Based Leadership Competencies.**
3. **Data-Driven Leadership Competencies**
4. **Driving Results Leadership Competencies**
5. **Leading People Leadership Competences**

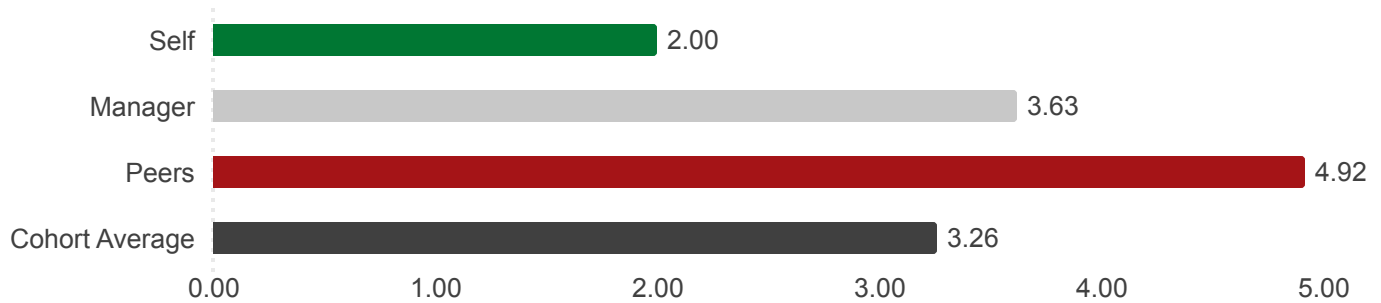

All of the scores in this report are summarized using the scale that you and your raters used when evaluating your competencies: 1 = Limited Skill, 2 = Somewhat Skilled, 3 = Moderately Skilled, 4 = Above Average Skilled, 5 = Highly Skilled

Note: You may notice that some categories do not appear in the tables below. This occurs when fewer than 2 raters responded for a manager, peer or direct report category in order to preserve confidentiality. No score indicates either no response or a "Not Observed/Not Demonstrated" response was received; this data is not factored into the category scores.

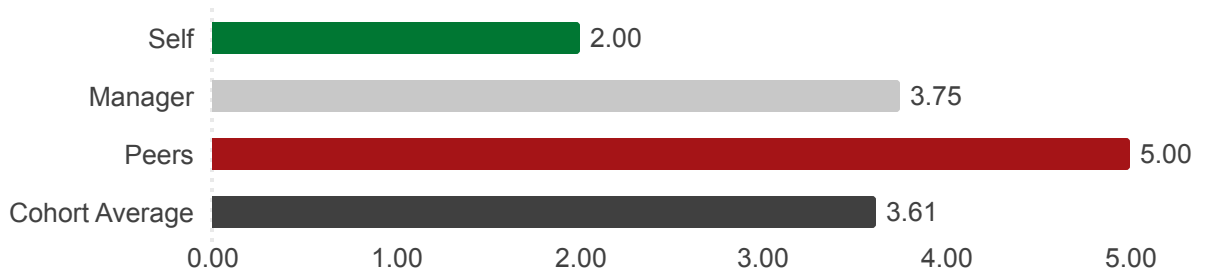

1.COMPETENCY SNAPSHOT

The following is a summary of your self, manager, peer, and direct report ratings on each of the competencies in the Bauer Leadership Competency Model, along with Cohort Averages (the average of manager, peer and direct report ratings from other respondents).

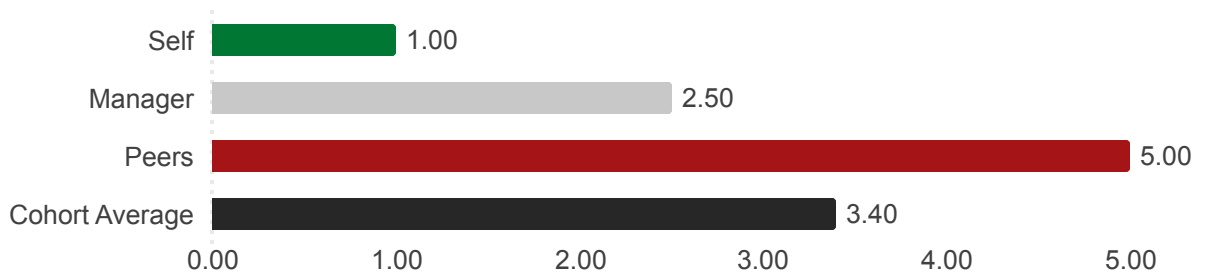

VALUE-BASED LEADERSHIP

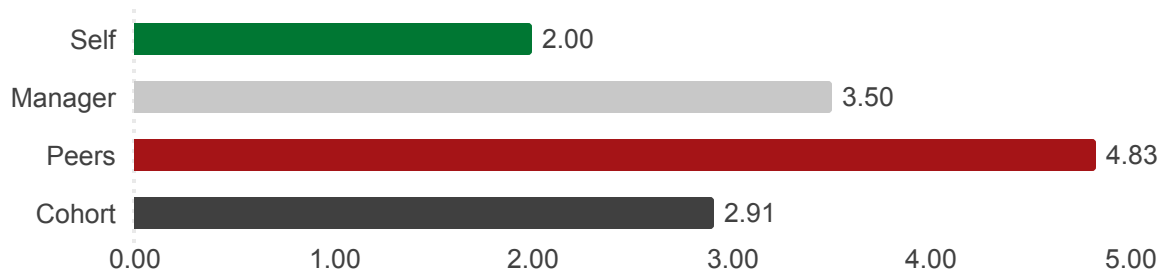

Shows Personal Value Integrity

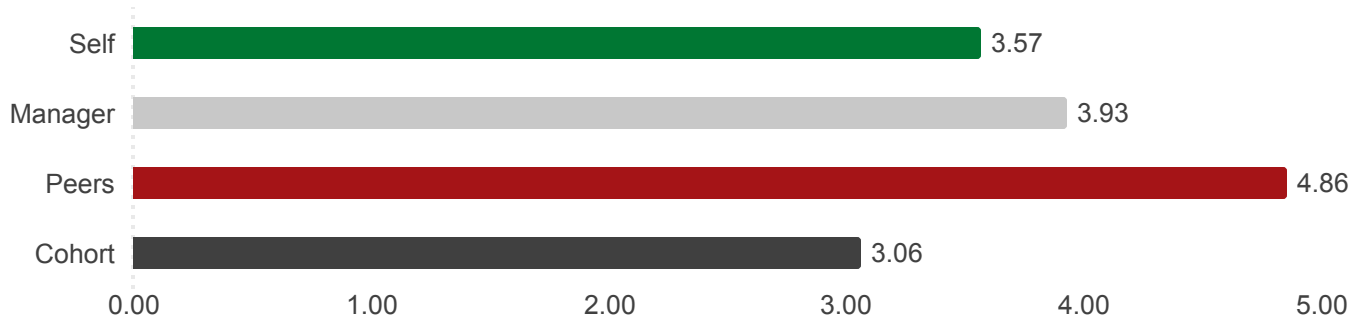

Champions Shared Values

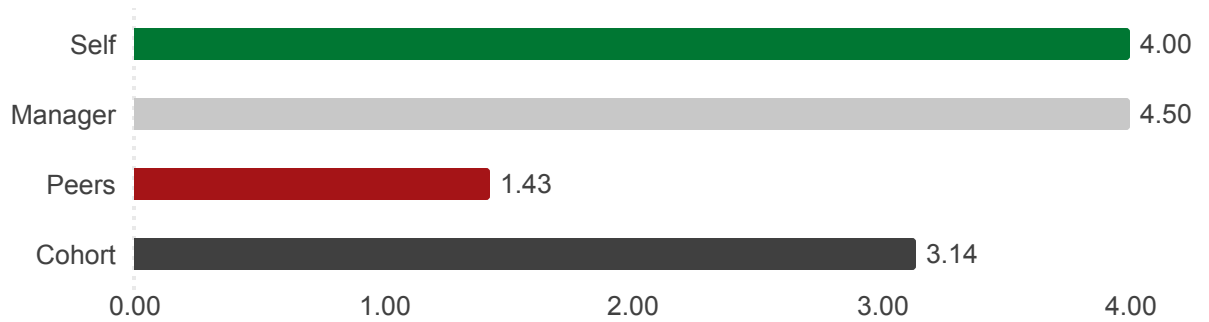

Honors Social Responsibilities

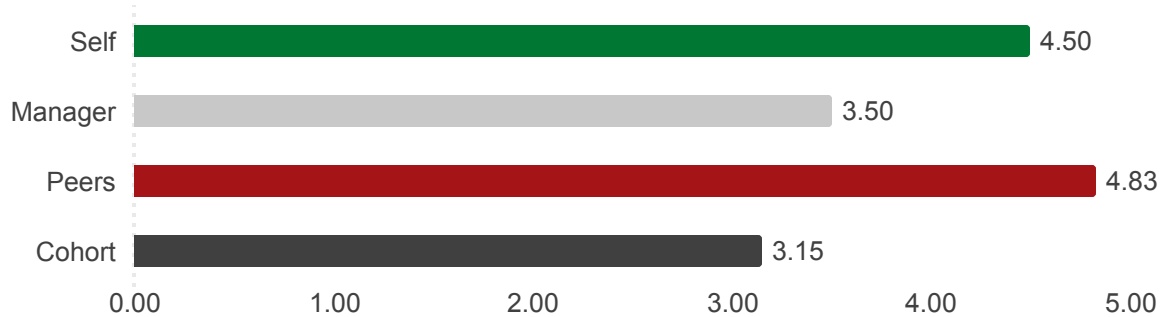

DATA-DRIVEN LEADERSHIP

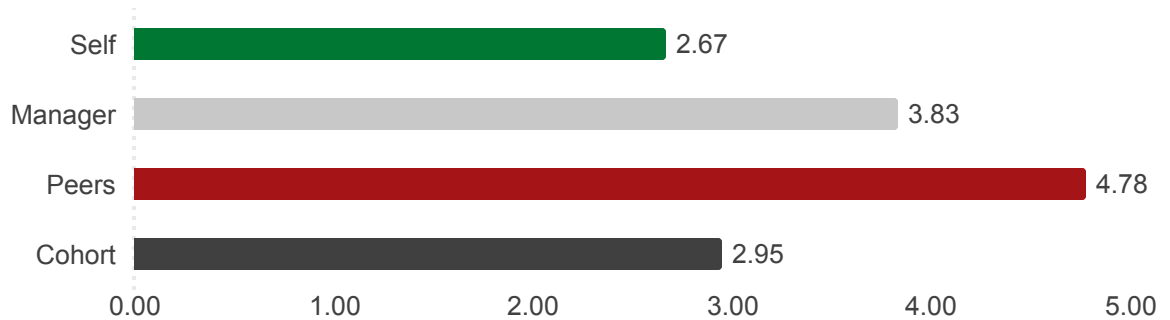

Tracks Process & Performance

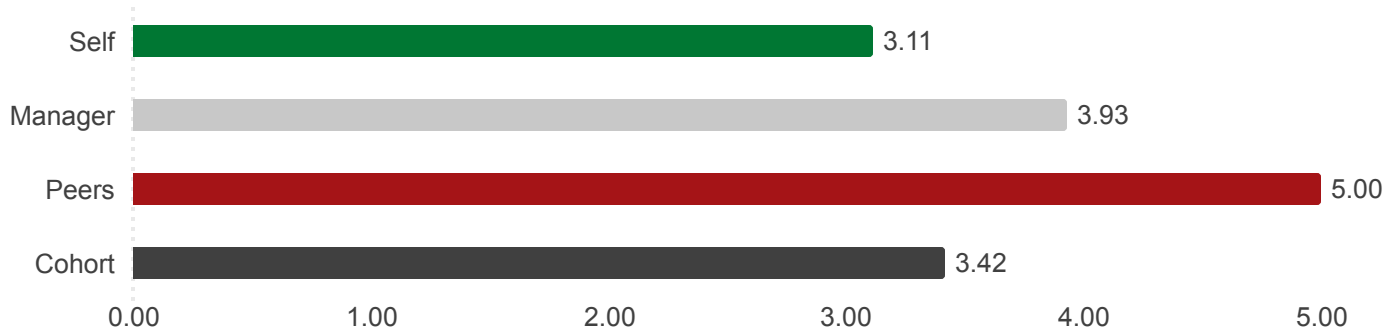

Leverages Data for Business Insights

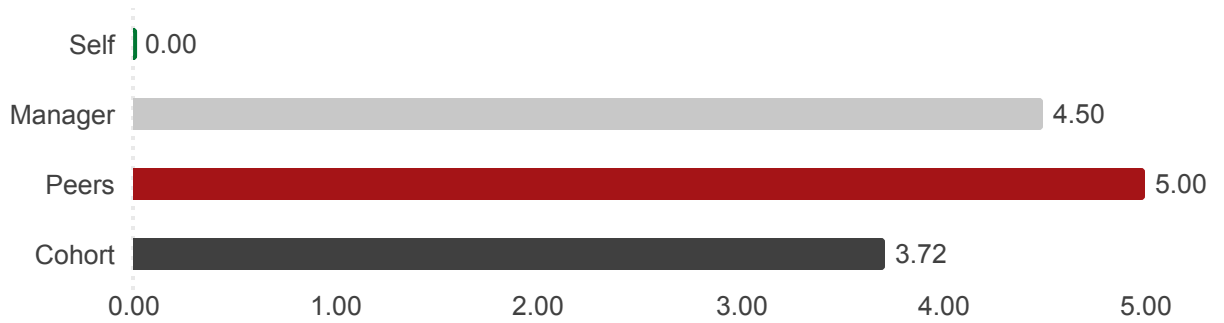

Builds a Data Culture

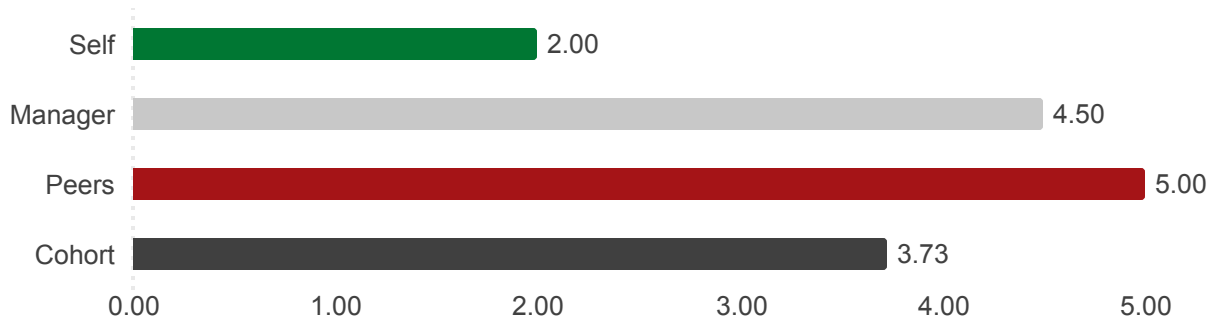

DRIVING RESULTS LEADERSHIP

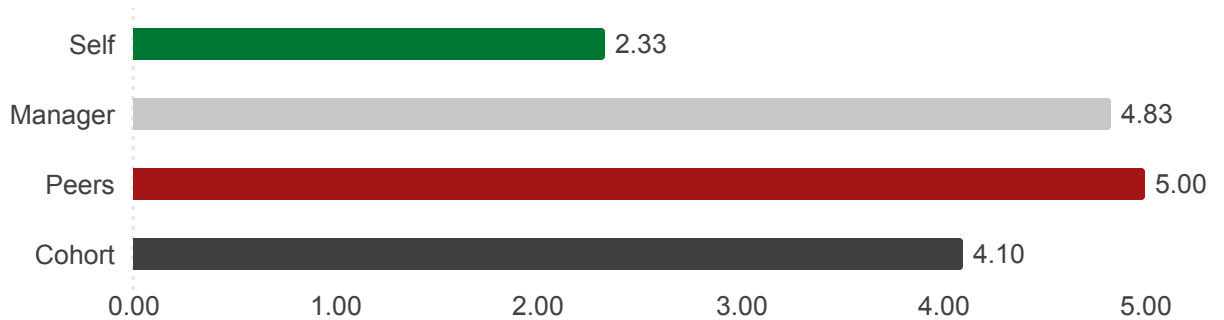

Sets Strategy and Direction

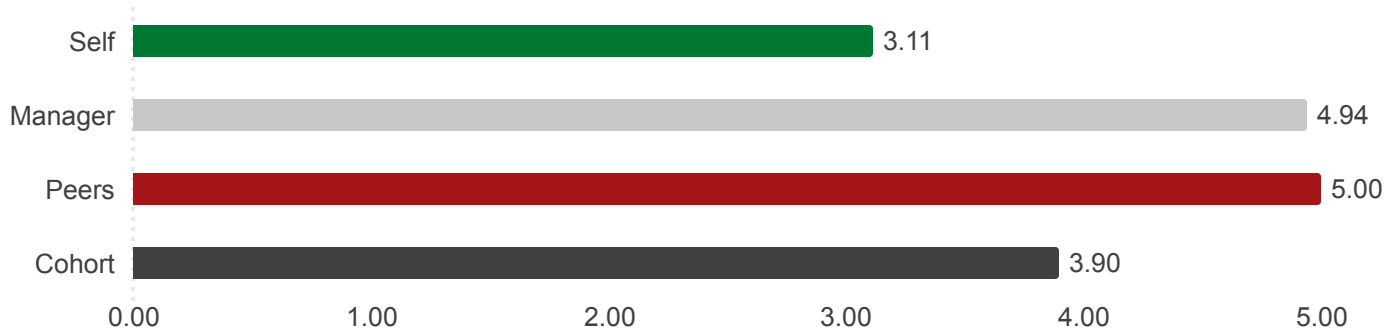

Ensures Strategic Alignment

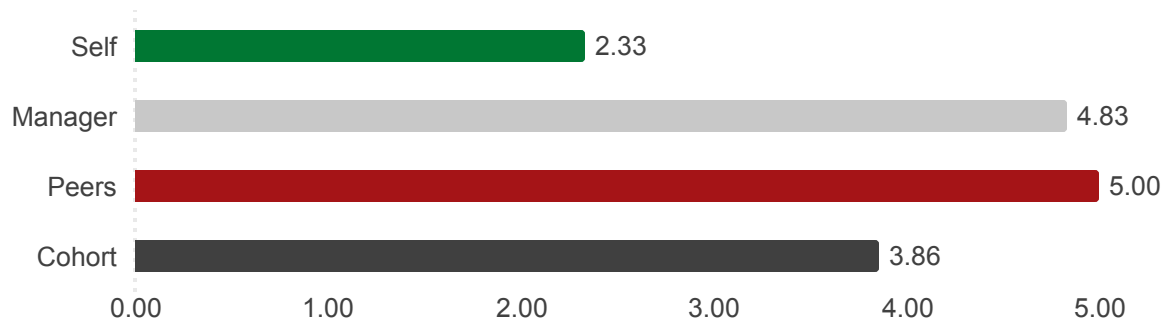

Drives Learning and Innovation

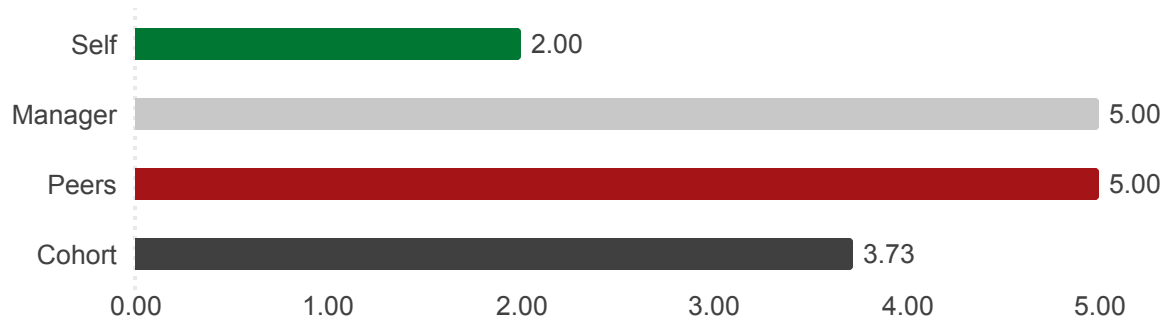

LEADING PEOPLE

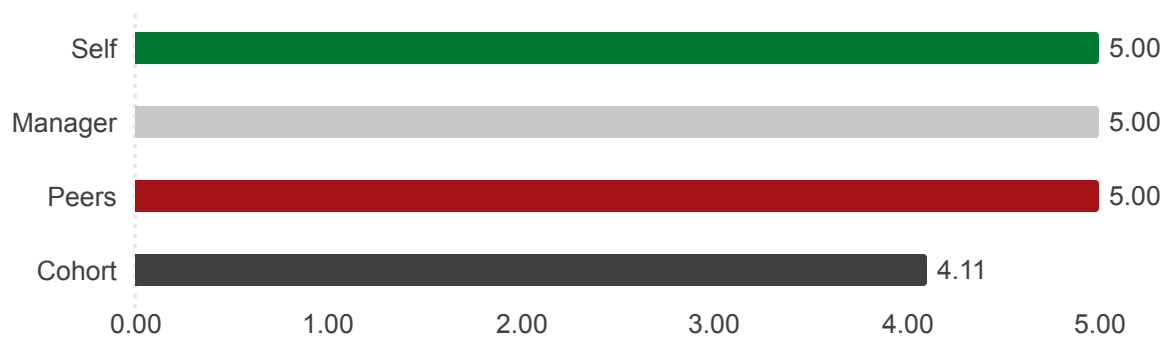

Influences Others

Develops Others

Build Relationships

2.VALUES-BASED LEADERSHIP COMPETENCIES

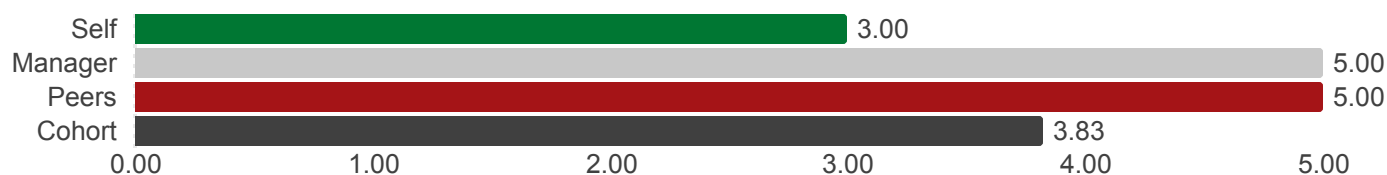

Organizations are expected to achieve both financial and non- financial ends and to operate in a way that engenders the respect and support of all stakeholders. Values-based leaders embrace this role by working to clarify values and social purposes, making sure values and purposes are honored in decisions and operations, and attending to the welfare of internal and external stakeholders. Values-based leaders are also clear about and true to their own values and higher purposes as a leader.

In terms of specific competencies, the values-based leader:

1. Shows integrity to personal values
2. Champions shared values and purpose
3. Honors societal responsibilities

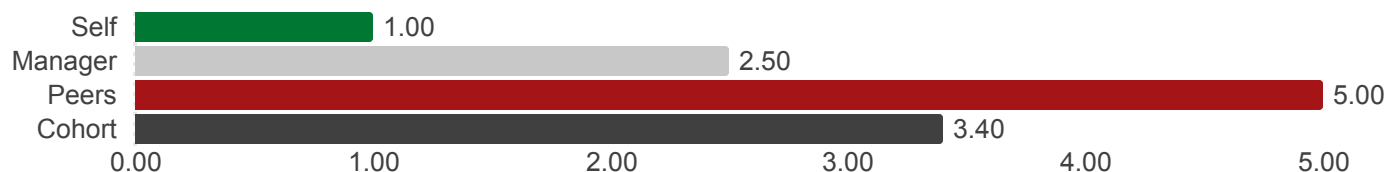

1. Shows Integrity to Personal Values

- a. Lives personal values and higher purpose as a leader

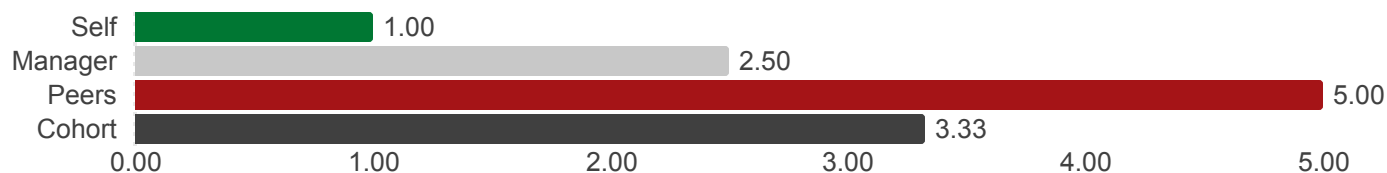

2. Champions Shared Values and Purpose

- a. Reinforces shared values and purpose through norms, practices, and rewards

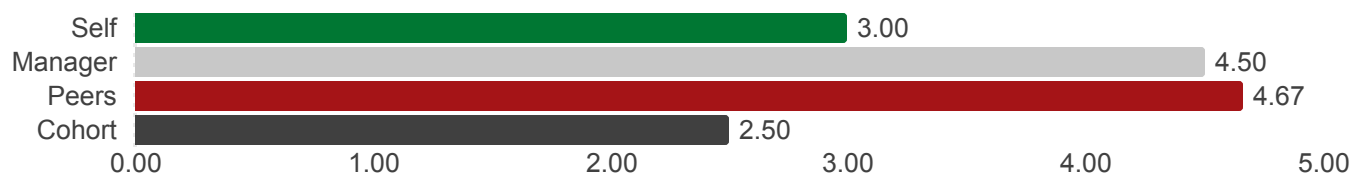

3. Honors Societal Responsibilities

- a. Considers stakeholder impacts and avoids harming stakeholder

- b. Works to advance a social purpose beyond profit maximization

3.DATA-DRIVEN LEADERSHIP COMPETENCIES

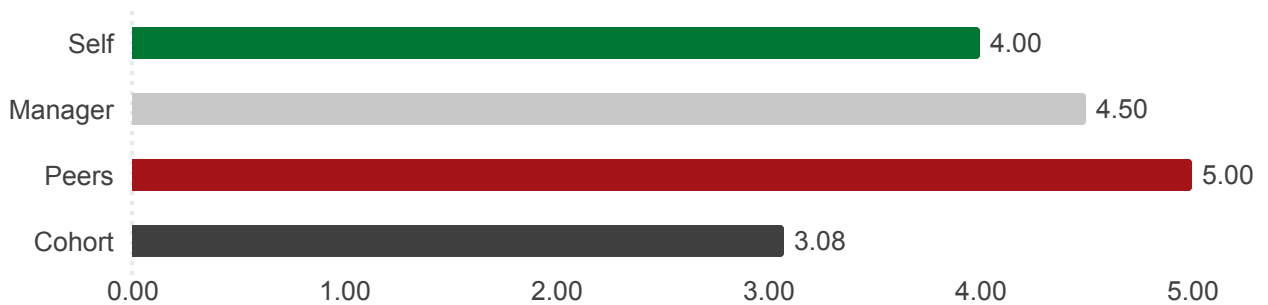

Whereas clarity around values is critical in helping leaders to articulate things as they should be, a commitment to data is essential so that leaders clearly understand things as they are, and how they might (and could) change. Data-driven leaders recognize the critical importance of data for decision making and performance improvement and work to create a mindset, a skillset, and a set of processes to encourage and support data-driven decision making.

In terms of specific competencies, the data-driven leader:

1. Measures key activities and outcomes
2. Leverages data for business insights
3. Builds a data culture

1. Measures key activities and outcomes

a. Captures relevant activity and outcome data

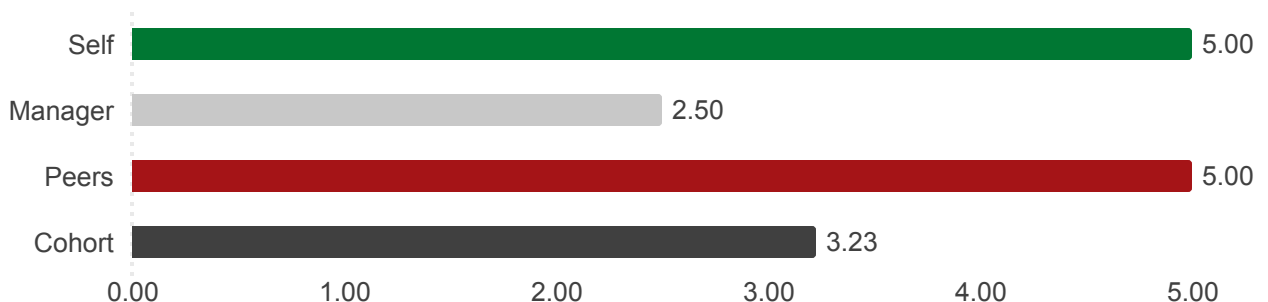

b. Establishes activity and outcome metrics to support decision making

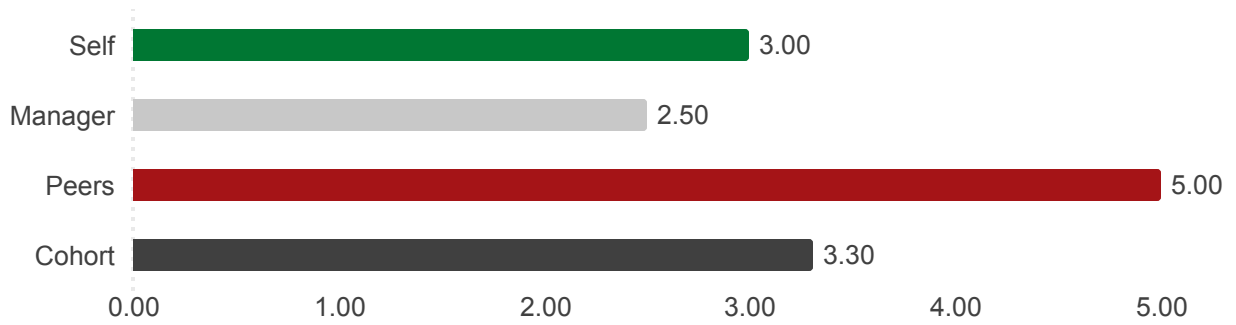

2. Leverages data for business insights

a. Analyzes data to make predictions and forecasts

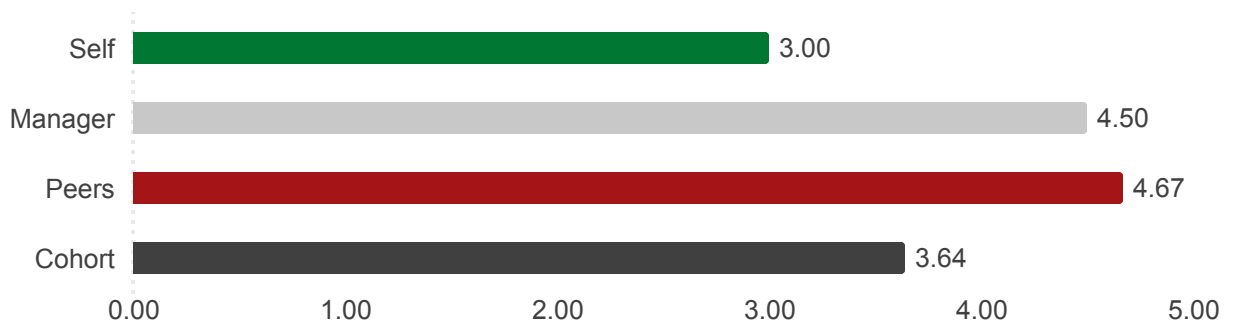

3. Builds a data culture

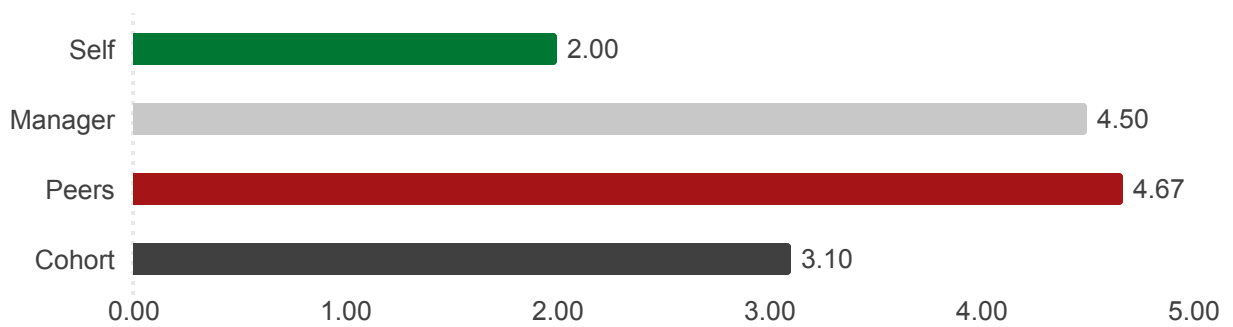

a. Builds data analytics capability

b. Insists on data-driven solutions

c. Knows the limits of data in business decisions

4.DRIVING RESULTS LEADERSHIP COMPETENCIES

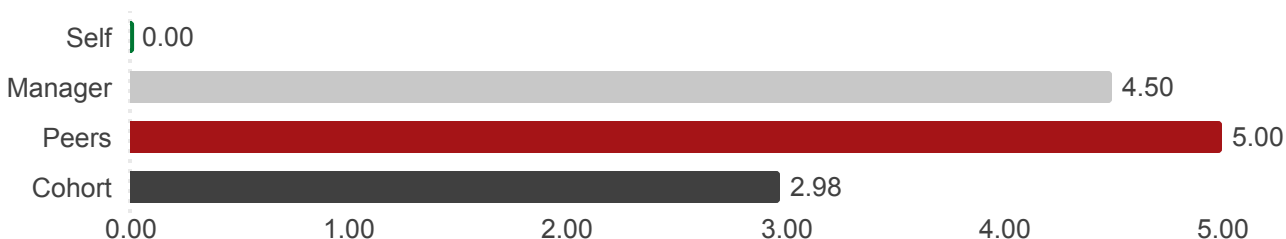

After decades of research on the behaviors of effective leaders, leadership scholars concluded that effective leaders do two things very well: 1) they are good at driving results and 2) they are skilled at leading people. Leaders who are good at driving results develop and communicate a clear strategy and direction and make sure that all team members are aligned behind that direction. Results-driven leaders also prepare for the future by investing in innovation and encouraging continuous improvement.

In terms of specific competencies, the results-driven leader:

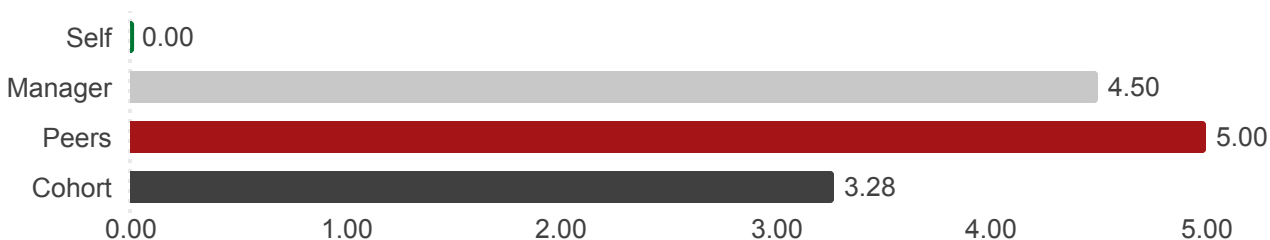

1. Sets strategy and direction
2. Ensures alignment & accountability
3. Drives innovation & continuous learning

1. Sets strategy and direction

a. Understands business/market opportunities & threats

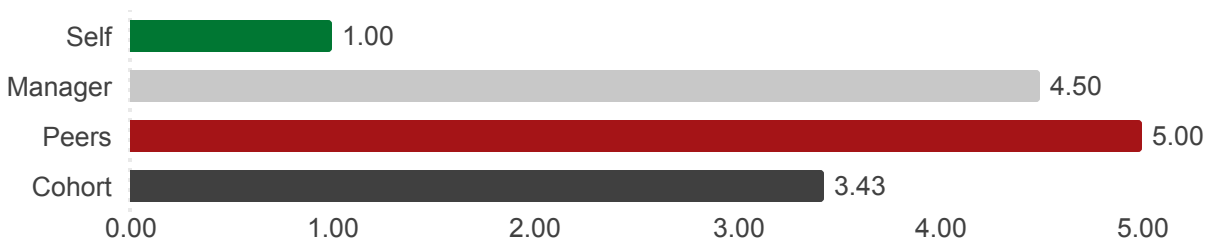

b. Defines and communicates a clear strategy and direction

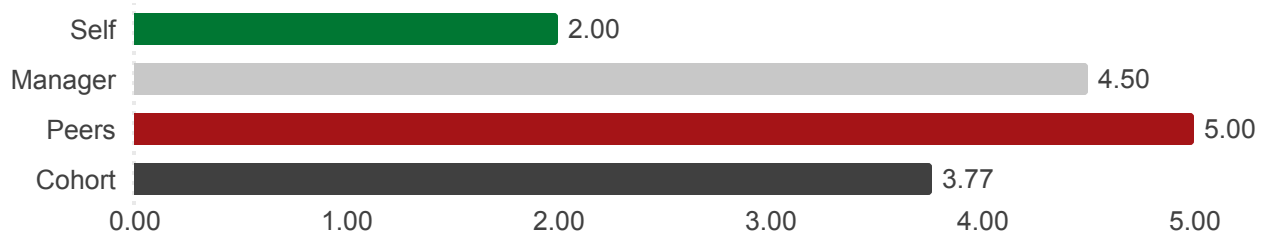

2. Ensures alignment & accountability

a. Translates strategic objectives to individual and team goals

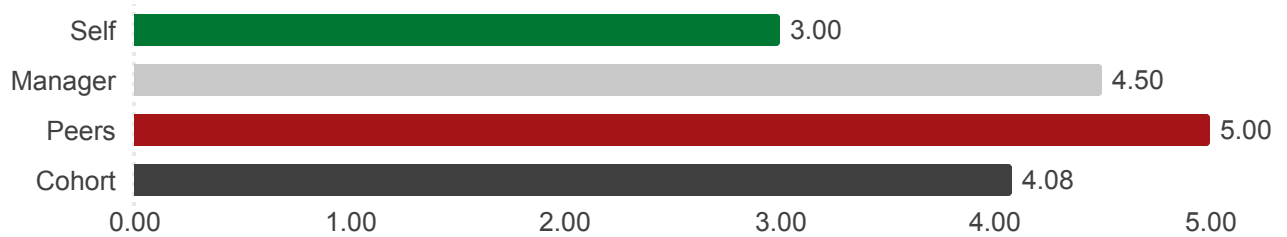

b. Holds individuals and teams accountable for results

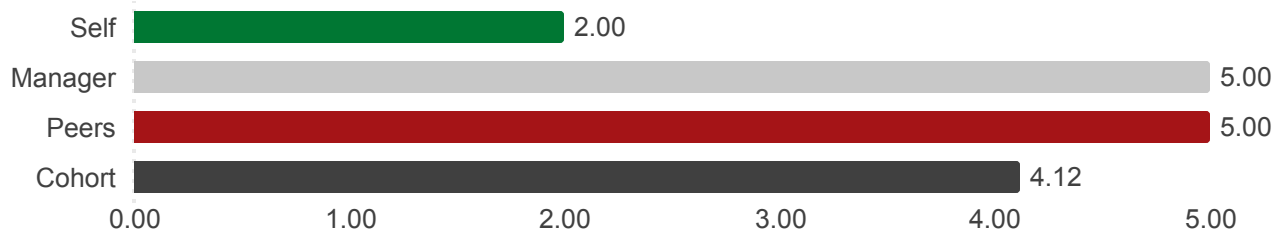

c. Provides support and resources to enable high performance

**3. Drives innovation & continuous learning**

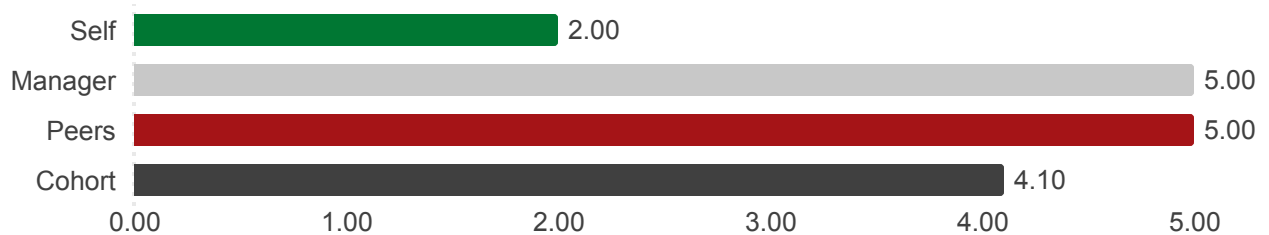

a. Promotes continuous learning

b. Encourages creativity, innovation & appropriate risk-taking

c. Encourages exploration of new ideas and technologies

5. LEADING PEOPLE LEADERSHIP COMPETENCIES

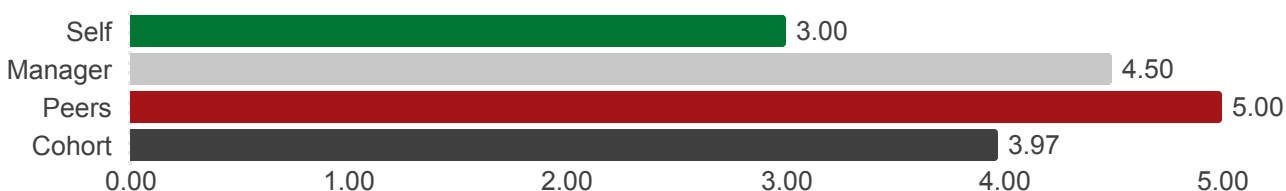

At the end of the day, leadership is about people. Standout, transformative leaders are those who not only know how to articulate values, consult data, and drive results but who also know how to move, inspire, motivate, engage, and elevate human beings in all their promise and imperfection. Skilled people leaders know how to turn potential into performance, conflict into collaboration, and a set of individuals into a synergistic team.

In terms of specific competencies, the skilled people leader:

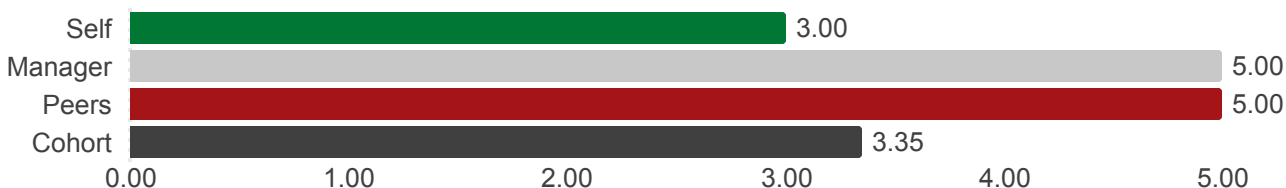

1. Influences others
2. Develops others
3. Builds collaborative relationships

1. Influences others

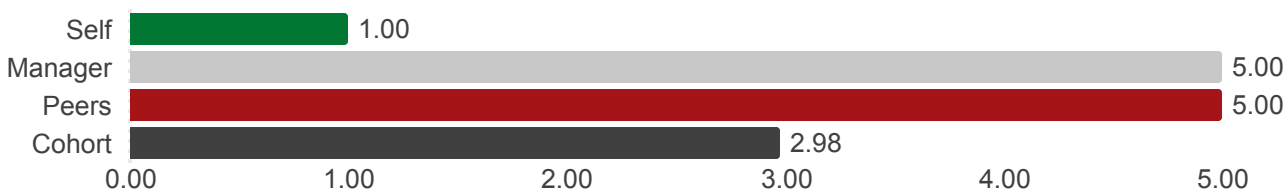

a. Motivates and inspires

b. Influences and persuades

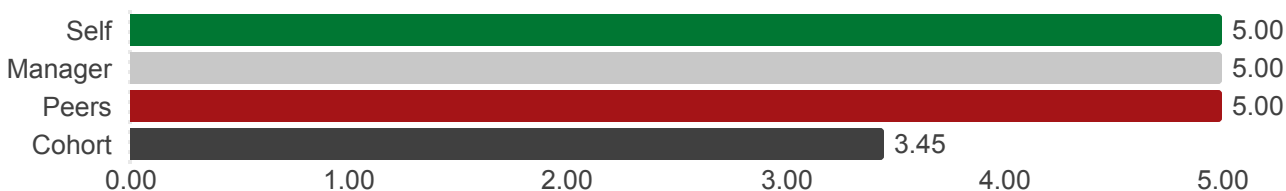

c. Navigates politics & power dynamics

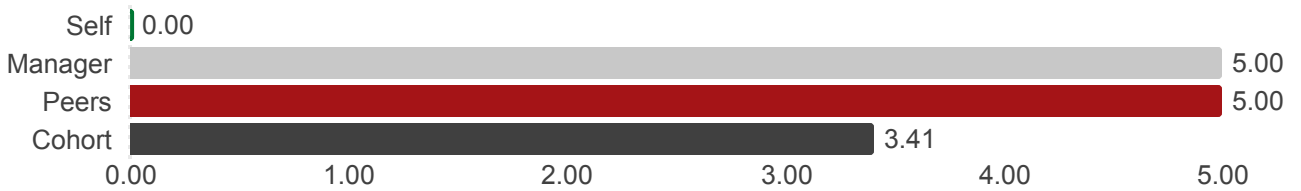

2. Develops others

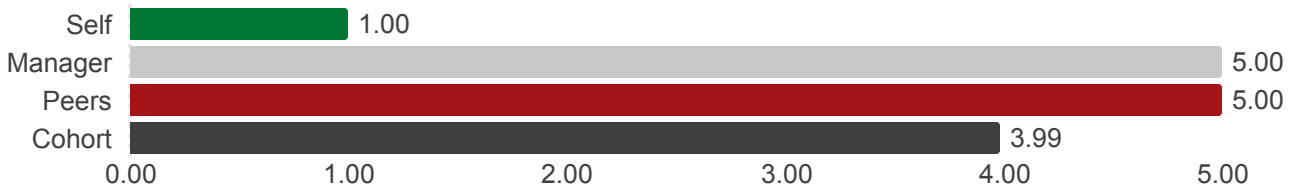

a. Coaches and mentors

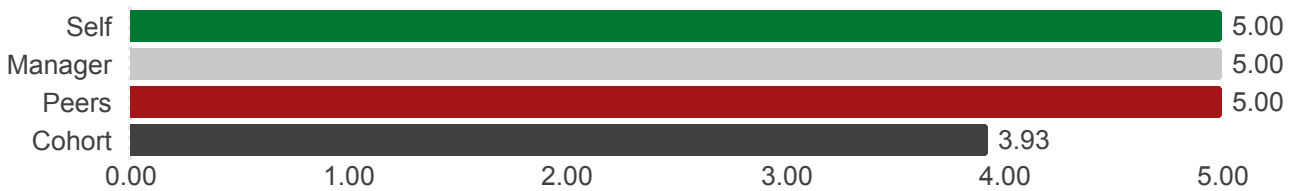

b. Recruits top talent

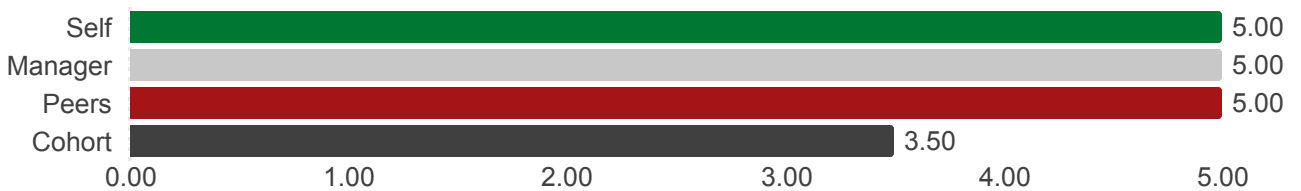

c. Values and leverages differences

**3. Builds collaborative relationships**

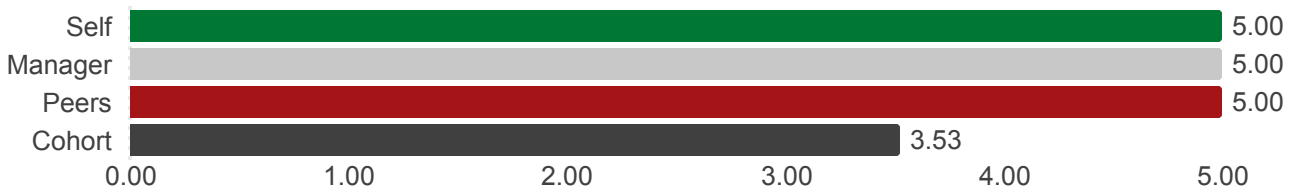

a. Builds win-win relationships

b. Manages conflict

c. Leads effective teams

OPEN-ENDED FEEDBACK

Managers, peers, and direct reports were asked to share feedback about your leadership style and offer suggestions for improvement.

Manager

Rony is intelligent, goal-oriented, honest, and always positive.

Peer

No data found - your filters may be too exclusive!

Direct Report

No data found - your filters may be too exclusive!

THE OLIN BUSINESS LITERACIES INVENTORY I: Feedback Report

The *Olin Business Literacies Inventory* (OBLI) was developed by the BLC with input from EMBA faculty at Olin. The OBLI provides a self-evaluation of your proficiency in each of the business literacies taught across EMBA. Business literacies are the core areas of knowledge and skill that are important in leading a business. You might think of them as the "reading, writing, and arithmetic" of business management.

The OBLI is a SELF-assessment. That is, the OBLI tells you whether you FEEL you are more or less proficient on each business literacy, rather than providing an objective assessment of actual proficiency. Your performance in courses, on tests, and in job assignments should therefore be consulted to complement what you learn from this self-assessment.

This feedback report can be useful in helping you to zero in on the domains where you feel more vs. less proficient as a business leader. It can also help you to identify those you feel are particularly important as you develop given your career goals.

This OBLI Feedback Report has been organized into the following sections, corresponding with the organization of the Olin MBA curriculum:

1. Lead, Measure, and Plan
2. Execute, Refine, and Innovate
3. Grow, Scale, and Globalize

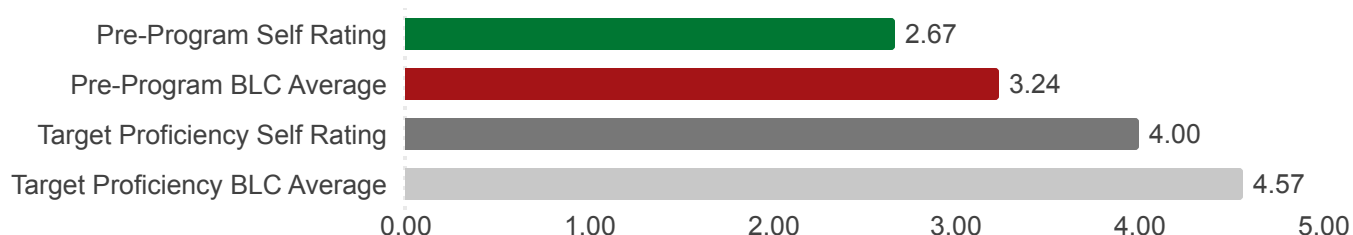

In each area, your report summarizes your assessment of your PRE-PROGRAM PROFICIENCY and your assessment of where you need to be given the five-year career goal you identified TARGETED PROFICIENCY. For comparison purposes, you will also see Bauer Leadership Center averages for about 150 other EMBA students who have completed the OBLI. Scores are on a scale from 1 (Well below average) to 5 (Well above average).

You will be invited to retake this assessment at the midpoint and end of the program in order to evaluate your progress on each business literacy.

PART 1: LEAD, MEASURE, AND PLAN

1A. LEAD

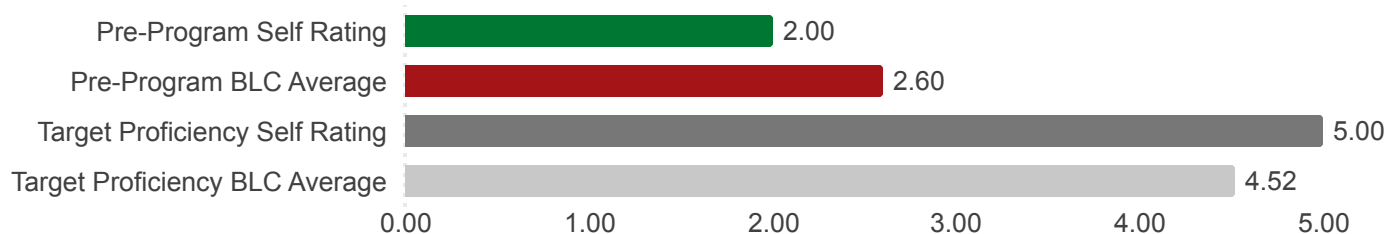

Leading Teams

Leading Teams includes:

- Understanding the factors that lead to effectiveness and dysfunction in teams.
- Applying proven strategies to remedy team dysfunctions and enhance team performance.
- Using peer feedback to assess my impact on my team.

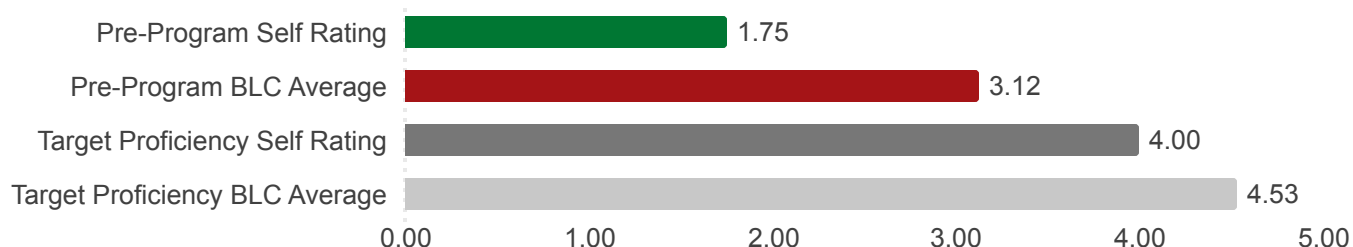

Business Strategy

Business Strategy

- Analyzing a firm's strategic position and industry structure in order to craft business strategies that generate long-run competitive advantage.

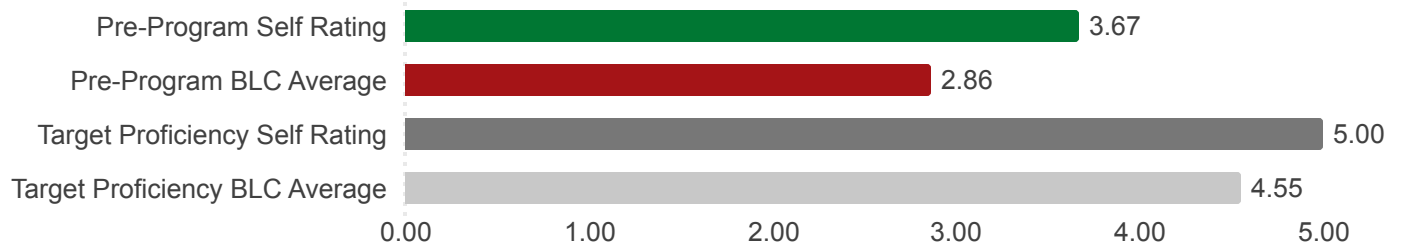

Leadership Development

Leadership Development

- Understanding the key elements of effective organization and people leadership.
- Using data to understand my personal leadership strengths and improvement opportunities.
- Planning for my personal development as a leader.
- Defining and articulating the values and higher purposes that will guide me as a leader.

Negotiations

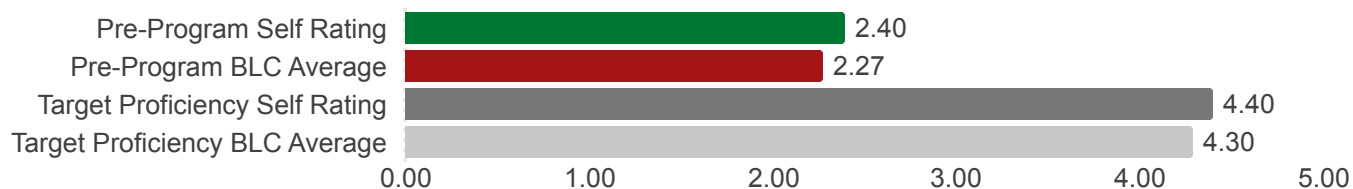

Negotiations and Conflict Management

- Using effective principles of deal design to create value in negotiations.
- Applying proven negotiating tactics to secure my primary interests while building professional relationships.
- Knowing how to identify and resolve conflicts before they escalate.

PART 1: LEAD, MEASURE, AND PLAN (continued)

1B. MEASURE

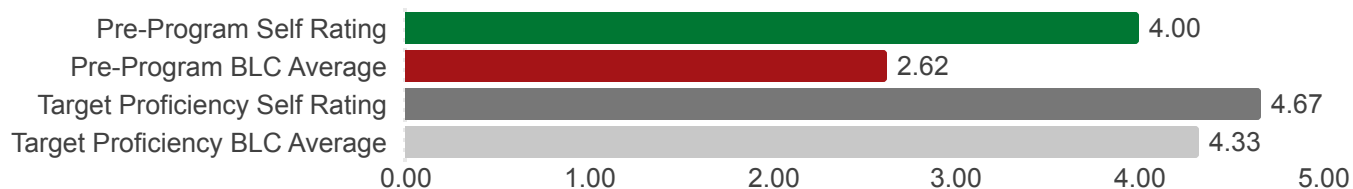

Financial Accounting

Financial Accounting

- Understanding the role and responsibility of leaders when it comes to financial reporting.
- Applying terms, concepts, metrics and geography of financial reports in order to evaluate the drivers of value creation.
- Reading and interpreting financial statements – balance sheets, income statements, statements of stockholders' equity, and statements of cash flows.
- Calculating and interpreting standard accounting metrics like free cash flows, ROA, ROE, profitability and risk ratios.
- Creating basic pro forma financial statements and appreciating a leader's role in developing consensus on the projections.

Business Analytics

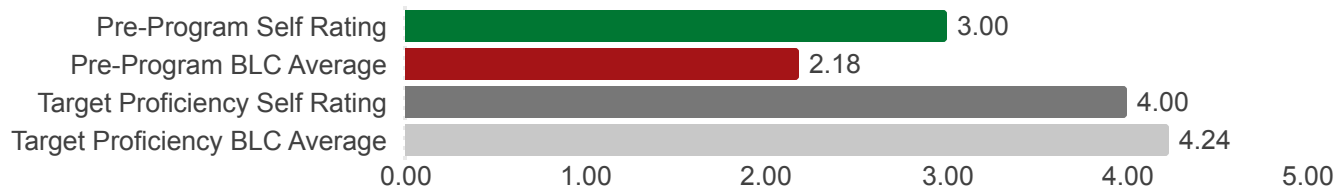

Business Analytics

- Understanding the scope of modern data science and analytics.
- Applying analytical tools and concepts to real-world data situations.
- Understanding how to create prediction and forecasting models

PART 1: LEAD, MEASURE, AND PLAN (continued)

1C. PLAN

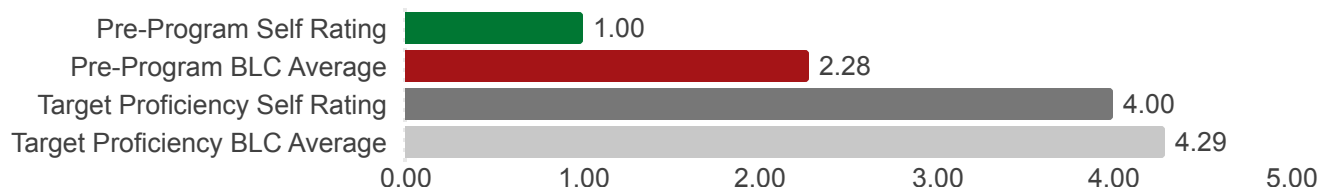

Microeconomics

Microeconomics

- Applying basic economic tools related to consumer choice, firm behavior, and demand/supply to analyze business problems.
- Understanding how economic value is appropriated and/or compromised through specific business decisions in areas such as pricing, make vs. buy decisions, mergers vs. alliances, contracting, franchising, and market entry/exit.

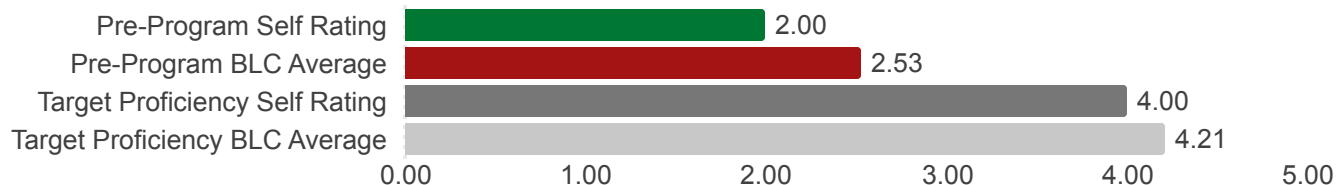

Corporate Strategy

Corporate Strategy

- Assessing the strategic advantages & disadvantages of multi-product, multi-business, and multi-location firms.
- Evaluating when and where to acquire, ally, merge, spin off, or divest.
- Designing organizations to encourage coordination and achieve efficiency.

Business, Government and Society

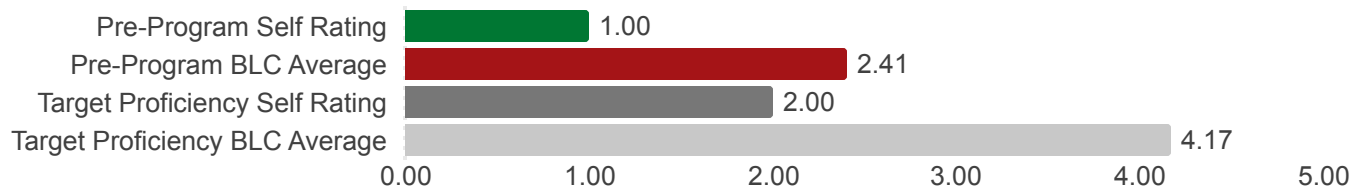

Business, Government and Society

- Understanding the role of government in shaping the competitive and institutional environment in which a firm operates.
- Understanding how business leaders can strategically navigate and work to shape regulations, policies, and laws.
- Recognizing business leaders can impact society, influencing social welfare, individual freedom & privacy, and public health.
- Knowing how to utilize the data, information, and knowledge produced by government agencies and leading think-tanks as inputs to business decision-making.

PART 2: EXECUTE, REFINE AND INNOVATE

2A. EXECUTE

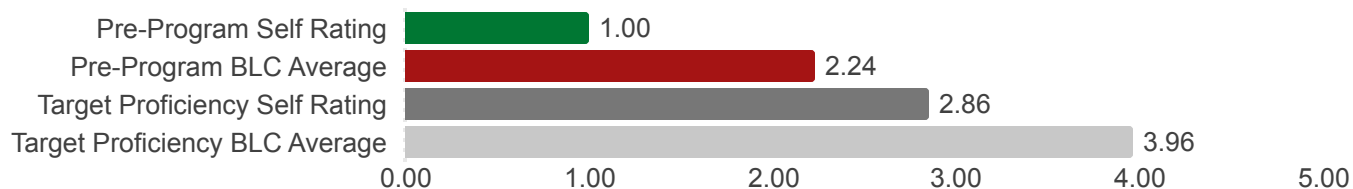

Marketing

Marketing

- Knowing how to analyze and influence customer behavior, including how to acquire and retain profitable customers.
- Using marketing tactics (price, product, promotion, placement) to drive performance.
- Understanding and managing financial aspects of marketing execution.
- Build a marketing plan to increase the success of new or existing products and services.

Operations

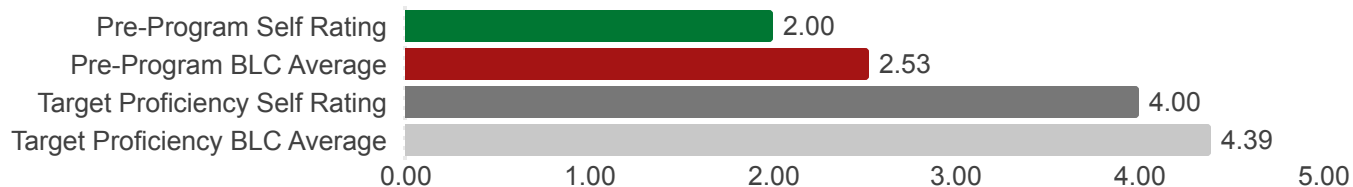

Operations

- Applying principles of capacity and variability management to analyze and design production processes.
- Utilizing established tools to plan production processes, including tools for lead time estimation, forecasting, and priority scheduling.
- Applying tools to analyze and manage inventory.
- Coordinating all of the elements of a supply chain to maximize efficiency and improve responsiveness.
- Applying quality management and six sigma practices to enhance production quality.
- Understanding the principles and practices of lean operations.
- Formulating implementation plans for operations & supply chain strategies.

PART 2: EXECUTE, REFINE AND INNOVATE (continued)

2B. Refine

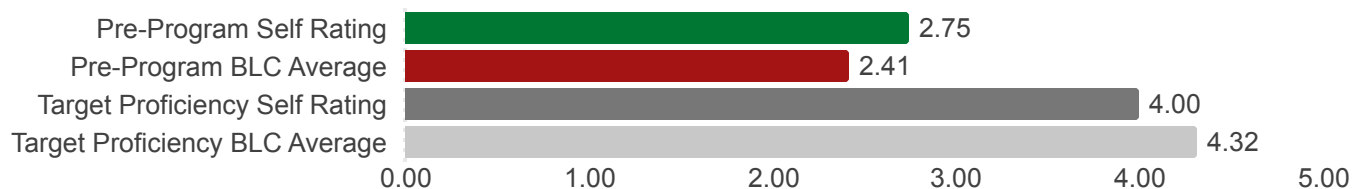

Cost Accounting

Cost Accounting

- Understanding how to manage costs to build a more effective and efficient organization.
- Leveraging the interplay between cost, strategy, and operations to make better organizational choices.
- Using budgeting techniques to improve planning and control of resources and activities.
- Evaluating business performance using holistic approaches such as the Balanced Scorecard.

Finance

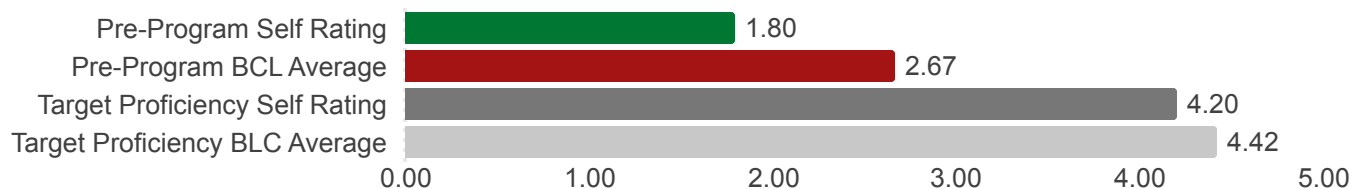

Finance

- Evaluating financial return on investment opportunities by estimating free cash flows and discounting them at an appropriate cost of capital.
- Understanding the tradeoffs when making resource allocation decisions in a constrained environment.
- Knowing how to make a compelling case for your financial resource requests.
- Feeling comfortable using the language of finance to make business discussions.

PART 2: EXECUTE, REFINE AND INNOVATE (continued)

2C. Innovate

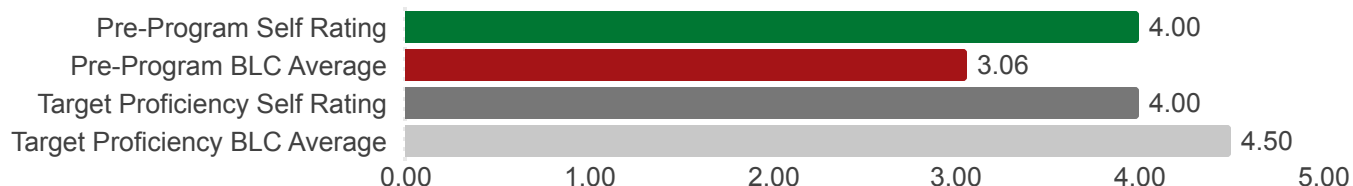

Innovation

Innovation and Entrepreneurship

- Understanding how an “entrepreneurial mindset” can be developed in both new firms and large corporations.
- Knowing how to identify problem areas where important business innovations can be made.
- Applying proven methods to analyze the value that can be captured from an innovation.
- Knowing how to effectively communicate business innovations to internal and external stakeholders.
- Understanding how to assemble human and organizational capital within an organization to encourage innovation and exploit innovative opportunities.

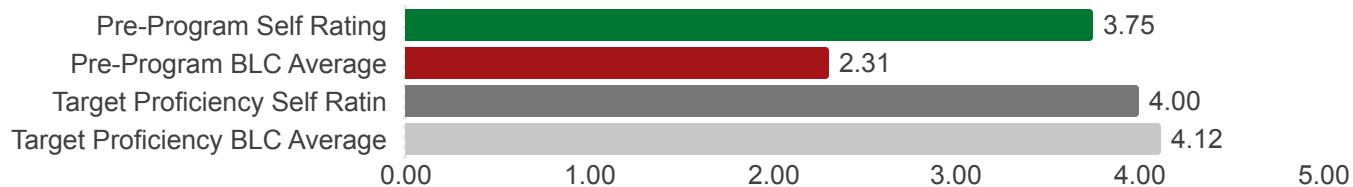

Creativity

Creativity

- Understand the creative process and how creativity can be fostered within an organization.

Data-Driven Decision Making

Data-Driven Decision Making

- Utilizing causal inference to analyze business problems while recognizing false causal inference claims.
- Analyzing how machine learning can be used to solve business problems.
- Understanding the structure and effective functioning of data science teams.
- Understanding contemporary and emerging issues related to data ethics.

PART 3: GROW, SCALE AND GLOBALIZE

3A. GROW

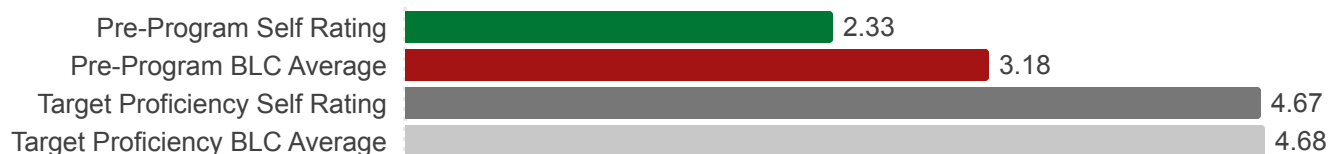

Growth

Growth

- Understanding the different options for growing a firm (organic vs. inorganic) along with their advantages and disadvantages.
- Understanding the evidence related to good vs. bad mergers and acquisitions (M&As) and learn the best practices of successful acquirers.
- Applying the Competing Values Framework (CVF) to formulate growth strategy that is integrated with a firm's culture and linked to resource allocation.
- Applying financial tools to value a potential acquisition target.

Organizational Leadership

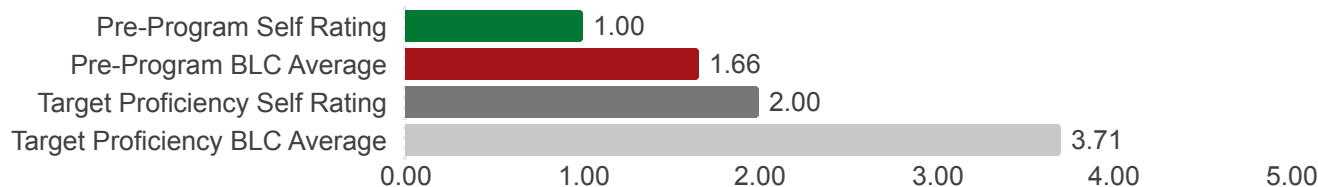

Organizational Leadership and Influence

- Understanding how to navigate the "informal organization" (politics, power, networks) in order to get things done.
- Utilizing a range of tactics in order to influence other people, with or without formal authority.
- Leading organizational change efforts effectively.

PART 3: GROW, SCALE AND GLOBALIZE (continued)

3B-C. SCALE AND GLOBALIZE

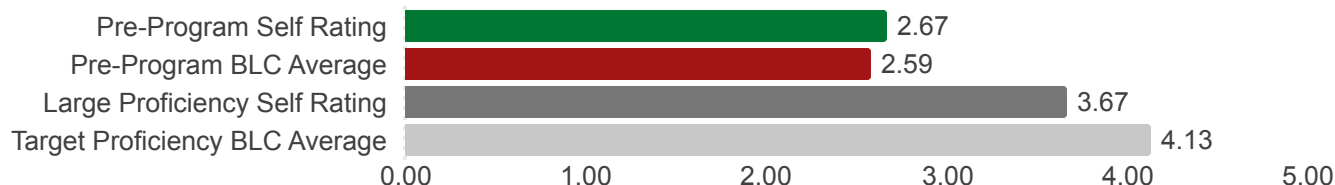

Global Supply Chain

Global Supply Chain

- Understanding how to locate and operate global production & service facilities given cross-national differences in productivity and quality, tariffs, taxation, risk, etc.
- Applying integrated risk management strategies to manage uncertainty when operating in different countries (e.g., operational hedging, operational/financial risk management).
- Articulating alternative approaches to structuring a global supply chain network and managing suppliers across national borders.
- Understanding how to build global supply chains that are resilient to uncertain events, evolving technologies, and major crises.
- Understanding how to build socially responsible global supply chains.

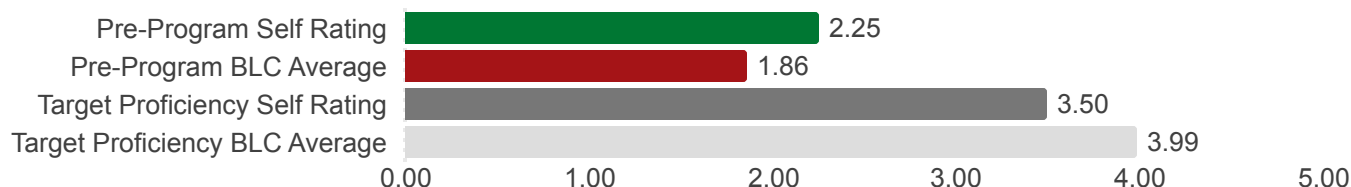

Global Leadership

Global Leadership

- Understanding how national cultural differences impact your business leadership and how to work with and around cultural differences in doing business internationally.
- Understanding how to lead culturally diverse and globally distributed teams.
- Identifying strategies for working with and around the cultural differences that arise in domestic business situations.

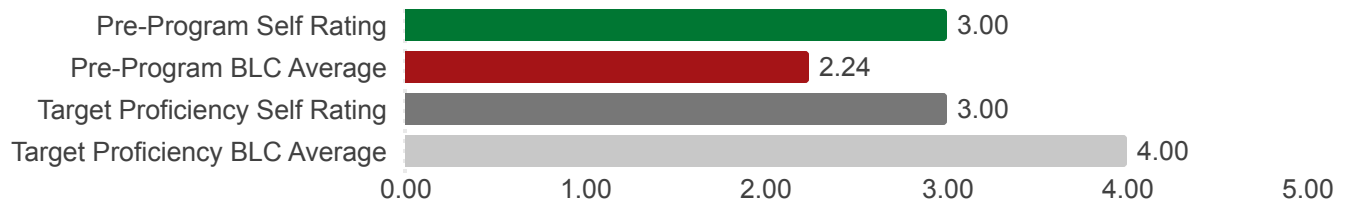

Valuation

Valuation

- Determining a firm's overall cost of capital and other discount rates.
- Identifying the relevant free cash flows for a project valuation and analyzing potential projects/acquisitions using discounted cash flow valuation techniques.
- Understanding the tradeoffs of using multiples and other valuation techniques.
- Utilizing financial modeling tools to assist with valuations and financial planning.

Geopolitical Environment

Geopolitical Environment

- Knowing how to analyze the history and culture of a region to better understand the region's political, economic and business environment.
- Adapting business models from one region to a new region in ways that address differences in culture, economic development, political economy, etc.

Finally, you were asked to summarize your five-year career goal and to keep that goal in mind as you responded to questions about your targeted level of proficiency. Here is what you told us:

Your Five-Year Career Goal

Where do you ideally see yourself professionally in five years? (E.g., position, industry, scope of responsibility, etc.)

In the next 5 years, I see myself taking the last steps to finish my training before starting my career. My long-term goal is to be an oncologist and researcher focusing on pancreatic cancer, developing new drugs and seeing them through to clinic.

In 5 years, I see myself finishing my internal medicine residency then graduating from my fellowship in hematology and oncology and starting as an attending at a hospital that supports my research endeavors.

I would also have maintained my collaboration with QNDX to continue my research for pancreatic cancer treatment.

Additional Resources

If you are interested in additional information & resources about these inventories : please refer to the following links:
