Technical Leader

Decision Driver

Contagious Creativity

Mission Driven

Technical Program Manager with proven success leading technical project execution through a varied product portfolio ranging from Defense Mission Computers to Commercial Avionics to dishwashers. With each new product I touch I have driven project execution and technical excellence as a leader with a tact for driving successful outcomes no matter the challenge. I hold a Secret Clearance last investigated in May 2024. My resume tells the story of a goal focused project engineer with experience in all the functions of product design including project management, systems design, electronics design, software project management, quality and operations management. In my personal life, I enjoy lifting weights, running, sand volleyball, and writing software.

PROBLEM SOLVER

Consistent record of **solving strategic problems** using creative, unconventional means, effective collaboration, big system thinking, and organizational skills.

MOTIVATIONAL LEADER

Over **10 years of leadership experience** in managing diverse teams with purpose, to maximize outcomes by utilizing intrinsic motivations.

COMMUNICATION EXCELLENCE

Experience in high leverage presentations – lead briefings on project schedule, design, and risk to all levels of leadership

LEAN PRODUCTS AND PROCESSES

Significant **program management experience and education**. Hands on experience in Enterprise scale product and process change.

PROFESSIONAL EXPERIENCE

The Boeing Company

April 2024 - Present
